

TRANSPOLIS SAS (France) and PMG TECHNOLOGIES (Canada) Create the International Consortium for Intelligent and Sustainable Mobility (ICISM)

Lyon, June 22nd 2017 – Transpolis SAS, creator of Europe’s first and only “city laboratory” dedicated to innovation and experimentation of urban mobility solutions, announces its international strategic partnership with PMG Technologies, a world leader in managing the most modern automotive testing and research center in North America.

Franck Bonny – General Director at PMG Technologies and Dominique Fernier - President of Transpolis SAS and director of l'Institut Français des Sciences et Technologies des Transports, de l'Aménagement et des Réseaux

Transpolis SAS and PMG Technologies created the International Consortium for Intelligent and Sustainable Mobility (ICISM), which already provides the following on a global scale:

- 3 transatlantic sites,
- Means for unique and complementary road safety tests and the mobility of the future around autonomous connected vehicles,
- Teams with multidisciplinary skills of 130 employees,
- Experienced “city laboratory” operators.

“Thus, Transpolis and PMG Technologies pool expertise and technologies essential to the systematic open collaborative innovation approach that will enable our global customers to experiment with urban mobility solutions on several continents. We are thrilled by this successful collaboration that will impact Transpolis and PMG’s partners, as well as governments, universities and industries thanks to the sharing of solutions and services brought forth by both partners who will soon be joined by a third one from another continent.”- Dominique Fernier, President of Transpolis SAS.

ABOUT TRANSPOLIS SAS

TRANSPOLIS SAS, which has no equivalent in Europe to date, was created in 2011 after having been incubated by the competitiveness cluster of LUTB. It brings the following shareholders together. Adetel group, aixam, caisse des depots et consignations, colas, eve system, groupama rhone-alpes auvergne, ifsttar, renault trucks, road equipment union, vibratex, vicat. It also receives financial support from these public players: (dge, region auvergne rhone-alpes, department of the ain, community of commons of the ain plain, metropolis lyon).

ABOUT PMG | TECHNOLOGIES

For over 20 years, Transport Canada, the minister of Transport, has relied on PMG Technologies to manage its Motor Vehicle Test Center (MVTC), which was established by Transport Canada to execute compliance and research testing on motor vehicles. The state-of-the-art test facility is one-of-a-kind in Canada and North America. PMG is recognized as a leader in providing innovative research and compliance test services to government organizations and private industries.
