

PRODUCT SPECIFICATION - APPLICATION & USE

(Expand Sections as necessary with further sheets)

PRODUCT NAME: **SPRINGFRESH**

GENERAL DESCRIPTION: Blue liquid with a strong floral scent.

USE FOR WHICH PRODUCT IS INTENDED: The modern mask for objectionable odours. SPRINGFRESH is a blend of a powerful rapid acting biocide, together with a pleasant and effective odour masking compound.

SPECIAL EQUIPMENT REQUIRED: May be used through a spray applicator.

METHOD AND CONDITIONS OF USE: SPRINGFRESH may be diluted with 100 to 150 parts of water before use. For treatment of drains, tips, rubbish carts etc., spray the diluted solution directly onto the area to be treated. For use as a space deodorant - spray through an applicator in 2 to 3 second bursts into the area with a fine spray. May be used in more concentrated form for particularly severe odour areas. The biocide is effective against sulphur reducing bacteria which grow in the absence of oxygen, such as stagnant or semi-stagnant water.

METHOD OF CONTROL: Adjust concentration until odour is eliminated.
