

## SKILL EVALUATOR

Is the quick, easy and convenient way to test typing skills. Whether you are a teacher wanting to test your pupils' skills before, during or after a programme of touch-typing training, an employer wanting to assess the typing skills of your staff, or an HR professional involved in the recruitment of office based employees, Skill Evaluator is the easy-to-use typing test solution.

Skill Evaluator is hosted online through a 100% secure Google site, so there is no software to install. Those administering the tests have total control over who takes a test, when and how often. And the Skill Evaluator administration system automatically gathers all the test results for later analysis.

### Skill Evaluator Features

Fully web-hosted program with no software to install

Easy administration, providing total control over the timing and frequency of tests for each individual student or groups of students

Test results automatically retained for later analysis

Secure Google web platform available 24/7

Administrators can select from a bank of tests available in the system or easily develop custom tests

Settings including test duration and test format

Same log-in details for students using Typequick courseware

Certificate generated for every student if required.

Users of Typequick's touch-typing training courses will find Skill Evaluator the ideal companion program. Students will be able to log onto their tests using the same user name and password that they use to log-in to their course, which makes access nice and easy. Skill Evaluator can also be used independently from Typequick training programs.

And what better way to measure the success of your Typequick training than running a Skill Evaluator test before and after students complete their course. It will provide the clearest illustration of the improvement your students will have made. Teachers can calculate how much time their students will be saving through having learned to touch type, whilst an employer can accurately assess productivity gains.

# Skill Evaluator Benefits

Quick, easy and accurate way to test typing skills before, during or after training

Clear illustration of the effectiveness of typing training

Provides the data in order to assess productivity increases and return on investment

Gives students a clear benchmark for improving their skills

Provides motivation with optional certificate

Develop your own custom tests to include text relevant to your organization

Automatically calculates the result without the need for tedious marking

Low prices makes for excellent value for money.
