

HARRISON

Lightning Protection & Earthing

Company Profile

WHO WE ARE

Born out of the Harrison Group in 2001, by Company Secretary Tony Stowe, we possess a wealth of experience that allows us to guide our clients from consultation and design right through to installation and maintenance, providing a fully comprehensive and bespoke service to our clients.

A consistent set of values drives our business – quality, approachability, flexibility, honesty and integrity is underpinning everything we do. Many of our clients have been with us since the beginning and we continue to be proud of the strong links we develop with everyone we work with.

Growing from our base in the North East we work on projects as far as St Kilda (Outer Hebrides) in the North and Exeter in the South; from clients as diverse as the Utility Companies to Local Authorities, Electrical Engineers and Facilities Management Companies.

Our procedures are driven to ensure everything we do complies with the industry standards BS EN 62305:2011 and BS7430.

HOW WE OPERATE

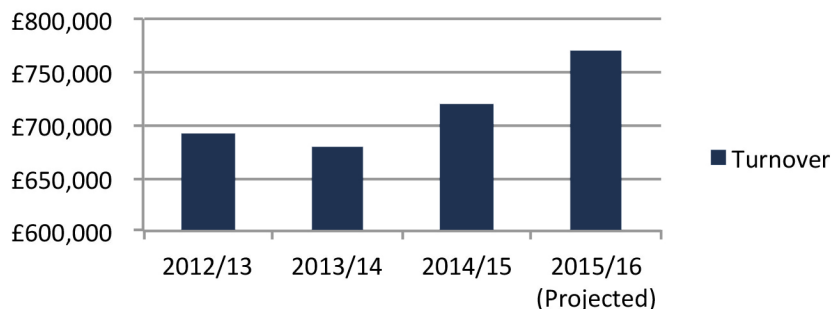

Regardless of what stage in the process are clients find themselves we aim to provide a solution that suits their circumstances.

We specialise in design, installation, testing and maintenance of lightning protection and earthing systems; guiding our clients at every step.

Specialist site engineers are supported by technical expertise at our offices you can rely on.

We understand every project is different and requires a bespoke solution and we are fully prepared to go that step for every client.
