

### Equipment Division

Gulf Group for Equipment's established in the year 2005. While there were intense construction activities in the ready mix sector in Kuwait, the market lacked reliable equipment to produce quality concrete mix. The circumstances provided Gulf Group with business opportunities based on the need for equipment suppliers. Gulf group decided to close agreements with reputable European manufacturers with state of the art construction equipment.

Representing an exclusive group of manufacturers and their respective products. Our efforts over the last 10 years has coincided with **KTI** - Germany for concrete cooling solution's and **PI MAKINA** the biggest manufacture in turkey for concrete batch plant, concrete pump, crushers & tower cranes. to provide the highest quality in technological and safety standards in order to ensure excellent results. To compete in the market, Gulf Group has also established new partnerships with **O.CUOGHI** manufacturer for concrete batch plants & Everdigm Korean manufacturer for concrete pumps & transit mixers . Gulf Group has also been service oriented company for the last 30 years in Electro mechanical fields which enhanced us as equipment seller for the construction industry.
