140' x 700' VP SERIES

OUR STRENGTH IS IN OUR STRUCTURE

We design and engineer our structures site-specific to your unique location. Critical to the performance and reliability of your building. Essential to the longevity of your investment.

CLEAR SPAN INTERIOR

Without center poles, pillars, or other interference, Calhoun's custom-engineered fabric buildings allow you to easily maneuver trucks and machinery while handling necessary loads like cranes, conveyors, or catwalks. Our structures offer durability, reliability, and versatility for any type of storage or warehousing business.

LOW OPERATIONAL COSTS

Calhoun's fabric covers provide an economical and durable alternative to expensive metal and wood construction. Our structures can be repaired or transported as needed, and the wide range of customizable options tailor the structure to your storage and warehousing needs. Our fabric covers are designed for lasting durability while allowing natural light to filter through, alleviating the expense of energy costs.

FULLY CUSTOMIZABLE

With a variety of structure designs and configurations to choose from, we custom-engineer your fabric structure any way you like to accommodate bulk materials, overhead equipment, conveyors, catwalks, and shipping and receiving equipment. Furthermore, you can incorporate a number of extra features such as HVAC systems or insulation for complete climate control.

ENGINEERED TO LAST

Our highly-trained engineers, designers and detailers have spent years building the strongest and safest structures available specifically for your industry.

QUICK RETURN ON INVESTMENT

Our structures boast low operational and maintenance costs in comparison to traditional buildings, while offering a large, secure, well-ventilated storage solution.

DEALER NETWORK

Our strength is within our extensive dealer network with representation across North America to locally serve you.

Our dealers can help you design and build the right building solution to meet your unique needs.

25 YEAR WARRANTY

Like shingles on a roof, years of wear and tear from the elements will require you to repair or replace the fabric. While the steel framework in a fabric building can last generations, it is an industry-standard expectation that the fabric cover will eventually need to be replaced.

Calhoun Super Structure is proudly backed by our own proprietary industry-leading 25-year warranty through our Elite FR and Non-FR fabric. For our standard FR and Non-FR fabric, we offer a 15-year warranty on every building kit including the steel framework.

WE UNDERSTAND FABRIC

Calhoun is unique in that we have developed specialized analysis which models the shape of fabric under load. By accurately determining various environmental loads that are applied to your structure, we use a nonlinear analysis. Calhoun's approach ensures the optimal design of the steel framework is determined for your building.

Our fabric is produced to withstand harsh weather conditions and treated with ultraviolet stabilizers to protect it from the sun's UV rays. This prevents the fabric membranes from weakening or breaking down, adding years to life for your fabric cover.

Available colours:

We also offer two fabric cover installation options depending on the size and budget of your structure: Bag Cover System or Keder Panel System.

Our Rubber Gasket Protection System is used between the aluminum keder track and hot-dip frame to prevent corrosion and wear. Calhoun is the only company that offers this level of detail and protection on their fabric covers.

Key Features:

- > Can exceed 150 mph winds
- > Can exceed 300 lbs per square foot snow load
- > Up to 16% translucency on Non-FR fabric and 19% translucency on FR fabric
- > The first Membrane Structure Fabric in the world to achieve Cradle to Cradle (C2C) Bronze Level Certification, through one of our fabric partners, NovaShield.

AVAILABLE PROFILES

CC Series
16'-72' Wide

SE Series
20'-30' Wide

GB Series
32'-62' Wide

HT Series
50'-82' Wide

VP Series
40'-250' Wide

OUR PROCESS

We realize that investing in a fabric structure doesn't happen everyday. Here's how Calhoun makes it easy for you.

1. Connect With Us

However you choose to connect with us, simply tell us what you need. It helps if you have an idea of approximate size and mount style, and whether you require ends or not. We'll take care of the rest!

2. We Assess The Details

Once we have an idea of what you need, Calhoun Super Structure digs deeper into your specific request including custom dimensions, fabric options, window and door options, ventilation systems, and any other particulars such as insulation liners.

3. Final Quote

We put all the pieces together and send you a proposal for your project. If you wish to obtain fabric samples, we can do that too! Once you approve, our engineers get to work.

4. Site-Specific Review

Here is where we employ our unique 3D Nonlinear FEA site-specific review to build you the strongest, most reliable fabric building for your specific location. This ensures structural integrity of your fabric building.

5. Fabrication & Shipping

Once the steel framework has been hot-dip galvanized and the fabric produced, your new fabric building is ready to go. Shipping times can vary depending on the size and scope of your

project, but generally your fabric structure can be manufactured and delivered in less time than a conventional building.

6. Installing Your Calhoun Super Structure

Calhoun Super Structure offers end-to-end service to install your new fabric building. If you wish to install the fabric building yourself, that is okay too. We can guide you through the process.

7. Post-Installation Service

Your new fabric structure should be assessed with a maintenance check after the first six months and then every year thereafter. Should you need a repair or re-cover down the road, we do that too.

DESIGN | CUSTOM-ENGINEERING | SITE-SPECIFIC ANALYSIS |
 MANUFACTURING | INSTALLATION | PROJECT MANAGEMENT |
 REPAIRS & RECOVERS | ADD-ON'S & EXTENSIONS

APPLICATIONS

- Assembly & Welding Facility
- Supplies Storage
- Distribution Facility
- Manufacturing Facility
- Temporary Warehousing
- Personal Garage Storage
- And More!*

NEED A RECOVER?

Whether you have an existing Calhoun fabric structure or another brand of fabric structure, Calhoun has the expertise, materials, and tools necessary to recover your fabric building.

No matter the level of damage, repair, building application, size, or brand, Calhoun offers full-service fabric structure recovers in-house, and installation through our extensive dealer network.
