Technical Information

Product Code M001

MULTI CLEAN TRAFFIC FILM REMOVER

MULTI CLEAN is specially formulated traffic film remover intended for use in pressure washing equipment. It effectively cleans vehicle bodies, chassis and machinery and removes traffic film, heavy soiling and grease. It is also an ideal for use as a hard surface cleaner in industry and food manufacturing areas.

ECONOMICAL IN USE

FAST ACTING AND LABOUR SAVING

CLEANS PAINTWORK AND CHASSIS

DIRECTIONS FOR USE

Vehicle cleaning:

To prevent streaking the vehicle should be wetted with water prior to the application of MULTI CLEAN.

Hot and cold water pressure washing equipment should be operated in accordance with the manufacture instructions, taking particular heed to any safety advice. Adjust the machine chemical control to give about 1% dilution at the lance, if necessary diluting the MULTI CLEAN with up to 4 parts of water in the chemical tank. Apply MULTI CLEAN evenly over the surface, covering convenient sections at a time and working from the lower section upwards. Allow time for the product to penetrate and then pressure wash to remove the loosened grease and dirt. Rinse thoroughly with clean water to remove all residues of MULTI CLEAN from the surface. Do not allow chemical to dry on paint work.

Hard Surface Cleaning:

For hard surface cleaning and washing down paint work, etc. use 1 part MULTI CLEAN with up to 40 parts hot water, depending upon the soiling to be removed. Apply solution with a brush, mop or cloth, and rinse off thoroughly with clean water.
