- Waterproof Material
- Less than 3kg (without plates)

Available in:

## Which Vest Is Right For Me?

This is the most important question you need to ask when purchasing body armor, because it can literally be a life or death decision. If the vest you are wearing does not protect you from the threats you are going to face then you will have wasted your money, and you will be putting yourself at risk.

When purchasing body armor you should always research the area in which you will be working, the history of attacks that have taken place there previously etc. This will help you to decide on the type of body armor that you will need and the level of protection you will require.

## NIJ Levels

All our panels are made from Kelvar® and are tested to NIJ Standards. For ballistic protection we use soft armor panels upto level 3a, which will protect from a range of NIJ listed ballistics. To protect against more powerful rifle rounds, we offer hard armor plate inserts which can offer level III and IV protection. We also offer both edged Blade and spike implement protection on which we again follow NIJ Standards for and offer levels 1-2.

Protection types available:

Edged Blade

Spike

Ballistic

## Body Armor Designs

Bullet and stab proof vests are generally made to be either covert or overt. A covert bullet proof vest is designed to be worn under clothes, and will often come in light colors. They are normally thinner than overt types of bullet proof vests, because they are designed to be invisible when worn under clothes. Overt designs of bullet proof vests are made to be worn over clothes, and are normally produced in dark colors. Generally they are made from rugged, hard wearing materials, and will often feature pockets and straps that can be used by the wearer.

**ALPHACORE**  
BALLISTIC PLATES

- Ceramic Level IV Plate
- 10 x 12 Front & Back SAPI Plates
- 6 x 8 Side Plates
- Level III/Level IV Protection
- Weight - 3kgs Per Plate

**ALPHACORE**  
BALLISTIC PLATES

- Level III Hard Ballistic Plates
- 10 x 12 Front & Back SAPI Plates
- 6 x 8 Side Plates
- Ceramic and Polyethylene options
- Weight - 1.2kg - 3.0kgs

## Choosing The Right Size For You

At SafeGuard ARMOR we believe the fitting of your body armor is just as important as the actual protective part, correct fitting means a more 3 dimensional level of protection and an all round more comfortable feel. If you are still not sure about sizing please visit [www.safeguardarmor.com](http://www.safeguardarmor.com) for a guide on sizing.

**ALPHACORE**  
BALLISTIC HELMETS

- Available in Two Styles
- Ballistic Level 3a Protection
- Adjustable chin straps
