

HOW TO FINANCE YOUR AIR COMPRESSOR

Glaston offer a number of easy payment options for their many air compressors. Here you can find the answers to your most frequently asked air compressor finance questions.

WHAT ARE MY AIR COMPRESSOR FUNDING OPTIONS?

If you wish to avoid upfront costs, Glaston are able to arrange a savings-funded financing scheme. This agreement involves pre-arranged portions of your company's air compressor energy savings being paid to Glaston until your air compressor is paid off.

Each payment will be no more than what your company has saved by using your new air compressor system, so your business will see no impact on cash flow. This easy method allows business to continue as normal, and once the balance has been paid in full, you will then be able to convert all of your savings into profit.

Alternatively, you can hire an air compressor with Glaston's air compressor lease option.

SHOULD I HIRE AN AIR COMPRESSOR?

Glaston can provide a deferred purchase hire arrangement over both long and short-term periods to ensure that your finance requirements are met with a solution that best works for you. This lease option allows you to procure your desired air compressor without the financial burden of upfront costs.

WHY CHOOSE GLASTON'S AIR COMPRESSOR FINANCE?

Glaston's engineers understand that, without the necessary air compressor audits, your energy savings will not fulfil the predicted long-term benefits of owning an air compressor. By choosing Glaston, you can take advantage of the included AirSave Manual, that provides you with essential information needed to conduct an audit of your factory.

If this does not work for your business, Glaston can simply manage the audit for you and provide you with an energy savings report to guarantee future savings.

Glaston's combination of affordable air compressor funding options and audit assistance will remove the stress of one-off payments and delays with procuring your equipment, while ensuring that your air compressor continues to provide energy savings long after your purchase date.
