

Star Tissue

Manufacturers of quality hygiene paper products

t. 01254 790153

e. sales@startissueuk.co.uk

www.startissueuk.co.uk

Welcome

Star Tissue is one of the UK's leading independent manufacturers of hygiene paper products. Star Tissue manufactures a wide range of household and away-from-home paper products from its custom built production facility in Lancashire.

As a family owned business we are proud of our strong reputation in the industry for providing exceptional customer service and value for money, whilst adhering to the highest ethical and environmental standards.

We offer paper products that are manufactured to the highest standard of quality, together with the flexibility to meet the diverse needs of our valued customers large or small.

★ About Us

Star Tissue UK manufactures high quality hygiene paper products that can be customised to fit into most dispensers or used as stand alone rolls.

We offer both pure and recycled tissue ensuring all our tissue is of a very high standard and is sourced from tissue manufacturers who are registered with Forest Stewardship Council (FSC). Our recent investments in new manufacturing technology enables us to emboss each ply separately and then laminate the plies together creating a stronger sheet with greater absorption capacity. We use the latest production methods producing a high quality finish to the end of the rolls.

Major investments in production facilities in the UK have enabled us to offer a wide range of very competitively

priced quality products efficiently with short lead times and the flexibility to match the products to the needs of individual clients and sectors.

Star Tissue strives to provide the highest level of customer service and is strongly committed to our continuous improvement programme constantly ensuring we are up to date with client requirements and market standards. All our AFH products in the Sirius, ecoroll and Evotex range meet the CHSA Soft Tissue Standard ensuring the products meet the specifications on the label. Star Tissue is also accredited with ISO 9001, 14001 and OHSAS 18001.

Having these three standards has set us apart from our competitors and enables us to manufacture consistently high quality products. The OHSAS 18001 accreditation has also helped create a safe and healthy working environment for all our staff. The ISO 14001 accreditation confirms our commitment to minimize environmental impact in our day-to-day operations.

We are proud of our strong reputation in the industry for providing exceptional customer service and value for money, whilst adhering to the highest ethical and environmental standards.

Certificate Number 13785

ISO 9001

OHSAS 18001

★ Advanced Capabilities

Over the past five years we have made significant investments in our plant, machinery and systems to ensure we can meet the diverse needs of our customers in the away from home washrooms, professional cleaning, healthcare, food service and industrial markets.

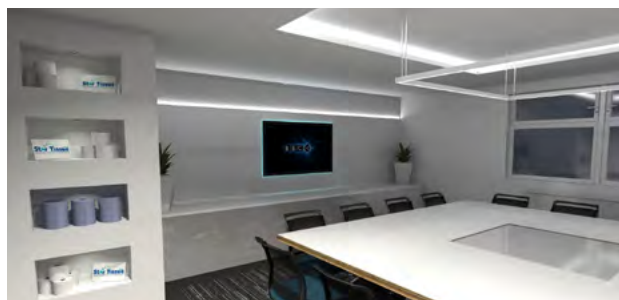

With four production lines we have the capacity to manufacture 18,000 tonnes of hygiene paper products a year that equates to over 1000 rolls a minute. We have invested heavily in two Laminated Embossed paper converting production lines. One is specific to away from home products and the other in consumer paper products. Our investments in the latest production technology allows us to manufacture ply bonded flat sheet, ply bonded embossed, laminated micro-embossed and laminated embossed in both the consumer and away from home markets.

We also recognise that logistics plays an integral part in ensuring customers receive a reliable and flexible delivery service. We have invested

heavily in our warehouse operation with over 100,000 sq ft of quality warehousing with the capacity to hold over 2000 pallets of finished goods ready for call off. Recently we added a new service yard spanning over 2 acres to support 8 loading bays this is to ensure that we can hold and load several lorries and vans at one time enabling goods to be loaded and dispatched more efficiently.

Star Tissue employees are at the forefront of our ambition to deliver the best possible quality and service to our customers.

Our transformation means increased investment in training and equipment, including spending on new processes in order to make them safer and less laborious.

Experience makes us reliable

Star Tissue UK has been established since 2003 and it has grown year on year to become one of the leading independent manufacturers of hygiene paper products.

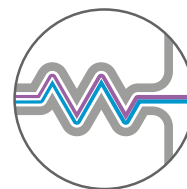

In 2016 Star Tissue featured in the London Stock Exchanges list of 1000 most dynamic and fast growing companies. Continuous investment in new production technology and systems enables us to operate efficiently ensuring we can meet the needs of our diverse range of customers. As you would expect this is supported by a reliable logistics function ensuring a flexible and prompt delivery.

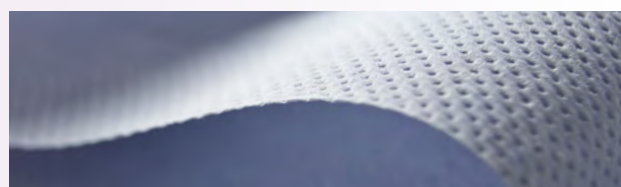

“Star Tissues are one of the first implementers of lamination technology in the Away From Home market in the UK. They have always demanded the best technology and innovation so by partnering with PCMC they are able to provide some of the very best products in the AFH market. With two PCMC Amica laminating embossing lines they have quality, flexibility and reliability at the core of their business”

Sergio Casella, President of PCMC Italy

What makes a laminated embossed product better?

Laminated Micro Embossed
For greater softness

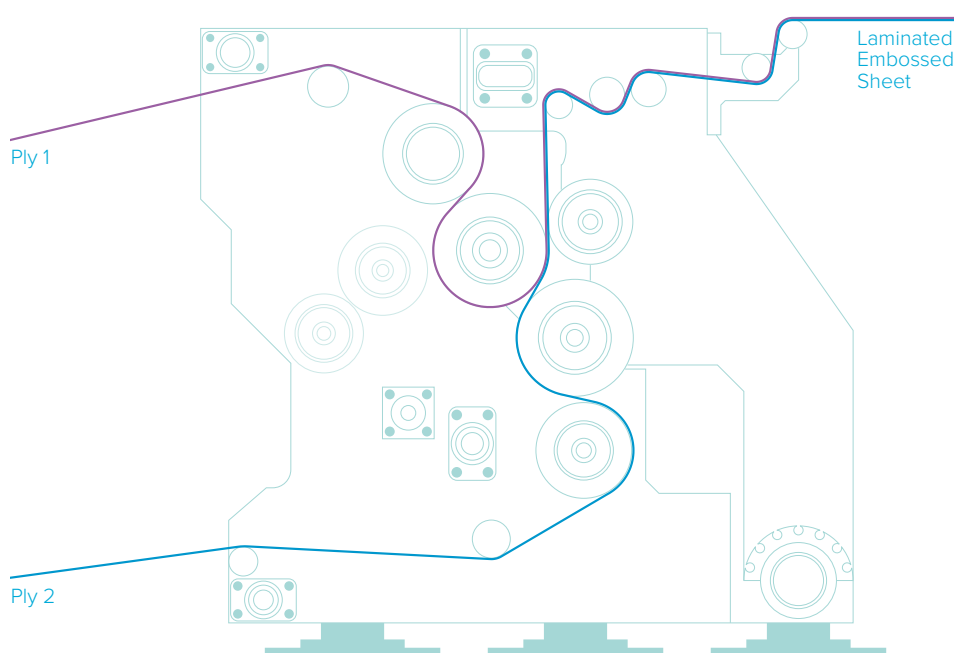

Laminated Embossed
For greater durability and high absorbency

Laminated embossed is the latest advance in manufacturing hygiene paper products. This entails separately embossing each ply in different embossing stations with a specific pattern. These plies are then laminated together by adding glue just wherever the embossing cylinder touches the paper ply.

For tissue towel products the plies are embossed with medium micro embossing to give the sheets improved durability and better absorption capacity. However when making toilet tissue products one ply is micro-embossed to give added softness and the other ply is embossed with a

geometric pattern. They are then laminated together to give a softer and stronger sheet. Laminated embossed (LE) products are the perfect choice for the discerning user who demands the highest quality hygiene paper products. Please see illustrations (above and below).

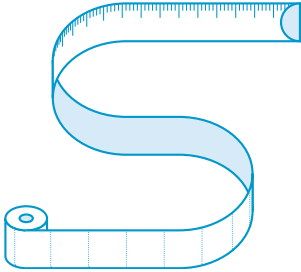

Key Benefits of Laminated Embossed products

- Improved Durability
- Greater Absorption Capacity
- Softer and Stronger Sheet

★ Private Label Service

We offer a wide range of hygiene paper products that are manufactured to the highest standard of quality, together with the flexibility to meet the diverse needs of our valued customers large or small.

We Specialise in private label products, we can package and distribute almost any product from our whole product range.

We can also offer our products bespoke to you in a range of alternatives including sheet size, core size, ply number, width and length options*.

Our private label service enables you to offer your clients high-quality products branded with your own unique label. You can decide on your own brand and we will provide you with a quality product manufactured to your specification supported by a reliable logistics function ensuring a flexible and prompt delivery.

★ Socially Responsible

As a company we acknowledge our responsibility to the environment and to our local communities in which we work and with which we do business.

We are actively involved in supporting and developing the local community to make a lasting positive impact.

Our employees are actively encouraged to participate in civic duties and many are involved in their local community centre, football club, foodbank, charity and school.

We are committed to minimising the impact of our activities on the environment.

Environmental responsibility is reflected in everything we do, from economising on energy resources to delivering our products to customers.

Constant efforts are being made to reduce the amount of waste generated by our activities through improved production methods and control measures designed to minimise waste. All tissue, plastic and board waste is retained for recycling by reputable waste management companies.

Key Environmental Objectives:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible
- Actively promote recycling both internally and amongst our customers and suppliers
- Source and promote a product range to minimise the environmental impact of both production and distribution
- Meet or exceed all the environmental legislation that relates to the company

Our Brands

We recognise that our business starts with our customers and our brands. We offer a choice of five quality brands Sirius, ecoroll, Evotex, Kleenall and Bliss.

The Sirius brand offers a wide range of quality products including toilet paper, centre feed rolls, industrial wiper roll, paper towels, hygiene rolls and dispenser toilet rolls for away-from-home washrooms, healthcare, food service and industry. Sirius is well established in the market place making it the right choice for professional working environments across the country. Sirius provides excellent value by combining the right amount of softness, absorbency and strength for the value minded customer.

The ecoroll brand offers a wide range of products made from soft quality 100% recycled tissue. Buying products made from recycled paper reduces the need for virgin wood pulp, which means more trees are left standing. ecoroll is well established in the market place making it the right choice for customers and organisations who demand premium quality eco-friendly products.

The Bliss brand is a premium range of 2 or 3 ply quilted toilet tissue that delivers excellent performance. Bliss products are laminated and micro-embossed. This high quality product has a softer and stronger sheet allowing greater absorption and softness for use at home and in workplace washrooms.
