

MVE Doble Series

- **Liquid and vapour storage options**
- **Low liquid nitrogen consumption**
- **Convenient lightweight package**

Tank Features

- Reduced investment as MVE Doble Series tanks are the first units designed for both vapour shipment and liquid storage.
- The **hybrid tanks** have a unique absorbent layer in the base of the storage tank, which enables them to be charged with nitrogen and employed as **dry / vapour shippers** resulting in hold times of up to thirty days.
- Their **rugged construction** means the MVE Doble series tanks are durable for shipment and storage - no short term investment, these tanks are designed to last on the plane, truck or farm.
- Once at the final destination, the tanks can be filled with liquid as normal and become a high quality liquid storage tank for **long term storage**.
- **40 years of technology** has led to the current range being the best-selling units for breeders' use, on the world market.
- Tanks in this range have a very **high capacity**, of up to 3,500 straws in a single vapour shipment.

- **THREE Year Vacuum Warranty**
- **Conforms with MDD 93/42/EEC, Medical Device Directive for the EU**
- The MVE Doble series are **simple to decontaminate**. MVE's exclusive hydrophobic absorption material not only guarantees optimum performance at all times (with no down time to dry out the tank) but enables water soluble solvents and disinfectants to be used for decontamination.
