## Hyundai HY3100LE

The Hyundai HY3100LE is a very popular electric start generator, with a tough but lightweight design, weighing in at only 43kg when dry, making it portable and easy to move.

The HY3100L 2.8kW is a petrol generator, with 230v/110v outputs, an AVR alternator, electric start and a Hyundai engine. This generator is the base model Hyundai and one of the most popular in the range, due to its lightweight and rugged build quality, making it ideal for the likes of builders, hire centres and mechanics.

It's a low cost generator, which can be used for small business and home use, boasting a max power of 2.8kW, using only a litre of petrol an hour.

### Specification:

- Weight: 45kg
- Maximum Output (kw): 2.8
- Continuous Output (kw): 2.5
- AC Voltage (v): 230/115
- DC Voltage (v): 12
- Frequency (Hz): 50
- Engine: Petrol 4-Stroke OHV
- Capacity (cc): 196cc
- Max Power (hp): 6.5
- Starting Method: Recoil Pull Start and Electric Start
- Fuel Tank Capacity (l): 15
- Noise Level (dB @ 7m): 65
- Ignition: Electronic Ignition for Easy Starting
- Dimensions (mm): 665 x 500 x 470
