Specialist Training For The Petroleum Industry

WELCOME TO GODAC

Dear Offshore aspirant,

The discovery of oil and gas in commercial quantities in Ghana brings new employment opportunities for those who will want to work in this industry and more especially for those who are already working directly on the oil platforms as drillers, rig managers, and in various other positions both locally and internationally.

Working in the oil and gas industry is a demanding job, and people who will be going offshore need training that prioritize quality, safety, and a high level of technical skill.

We at GODAC believe that for our trainees to be successful and become full participants in the oil and gas industry, we need to train our local and international resources in all areas, including those who will be working directly on the rigs.

For this reason we have taken it upon ourselves to provide high quality international standard training, that focuses on quality, safety, and high level technical skills which enables our trainees to fully participate in diverse disciplines at all levels of the oil and gas industry.

GODAC will want to take this opportunity to wish you a successful career and future in the oil and gas industry in advance.

Yours sincerely,

GODAC Secretariat

GODAC PROFILE

GODAC is one of the first training centres in the West African sub-region offering a standardized, internationally recognized training in the offshore/onshore oil drilling and related disciplines.

GODAC is partnered with two of the world's most respected and trusted institutions in oil drilling in Europe ie. Nortrain (Norwegian Drilling Academy) of Norway and Caledonian training of Arbedeen, Scotland.

This partnership brings to GODAC a combined wealth of over 40 years of experience in training all sectors of the work-force for the oil and gas industry across the globe.

GODAC programs are recognized by the following organizations:

1. International Association of Drilling Contractors (IADC).
2. International Well Control Forum (IWCF).
3. Norwegian Oil Industry Association (OLF).
4. Ghana National Petroleum Corporation (GNPC).
5. Indian Drilling Association.
6. ISO 9000 : 2001.

Mission & Vision

Our mission is "to provide our delegates with high quality state-of-the-art training in oil drilling and related disciplines to prepare them for full participation at all levels of the oil and gas industry".

Our vision is "to be the cradle of expertise in the emerging African oil and gas industry and adventure.

Oil Seminar

PRESENTS

a two session course **Introduction To The Oil And Gas Industry**

Are you planning a career in the upcoming Oil & Gas Industry?
Do you dream of getting a high paying job in the Oil & Gas Industry?
Do you wish to supply and render services to the Oil & Gas industry?

This introductory course will provide participants with an overview of the Oil and Gas industry. It is an awareness course providing both technical and non-technical personnel with a comprehensive overview of the terms and processes involved in the various branches and disciplines of the petroleum industry.

Course Objective

The aim of this course is to introduce participants to the Oil & Gas Industry and to enable them take better advantage of the opportunities the petroleum industry provides. The Program is for both Technical and Non-Technical Personnel.

This 2-day course will provide participants with introductory knowledge and understanding of the following and more:

- * The origin of oil and gas industry
- * The process of exploring for hydrocarbons
- * How governments control the exploitation of hydrocarbons
- * The terminologies and language of the business
- * The process of drilling for oil and gas
- * The process of producing petroleum

Who Should Attend

This course is ideal for all those who want to build a career, develop and sell service or become entrepreneurs in the oil and gas industry.

The course will benefit both technical and non-technical personnel such as:

- * Finance personnel
- * Human resource professionals
- * Contracts/procurement specialists
- * Information systems specialists
- * Administrative and technical support staff
- * ICT support staff
- * Businessmen and Women
- * Contractors and Suppliers
- * Health, Safety & Environment Personnel
- * Goods & Service Providers

Attending this course will give you an advantage over others when you apply for jobs in the oil industry.

Course Outline

Session 1

- * Industry structure and Development
- * The Origins of Oil & Gas
- * Products from Petroleum
- * Control of Petroleum Exploitation
- * Oil Reservoir and its Life Cycle
- * Opportunities in the Oil & Gas industry

Summary / Q & A

Session 2

- * Drilling & Oil Rig Systems
- * Oil Well Completion
- * Production and Transportation
- * Refinery and Transportation
- * Logistics
- * Health, Safety and environment
- * Opportunities in the Oil & Gas industry

Summary / Q & A

Complete course overview

DRILLING & WELL SERVICE TRAINING ADVANCE COURSE LEVEL 1 DURATION: 4 MONTHS

IWCF CERTIFICATION: DRILLING AND WELL SERVICE

IWCF certification is required for all drilling and well service personnel working at managerial levels. The qualification must be updated every two years. Candidates must pass two theory tests and a practical simulator exercise. There are several options for updating this qualification:

Experienced personnel can undergo preliminary tests, a practical exam and a theory exam as part of a two-day course.

Less experienced employees can take an extended course, which is between three and five days of teaching, followed by one day for the practical and theory exams.

IADC DRILLING AND WELL SERVICE TECHNOLOGY ADVANCED LEVEL 2

At the modular technical college, students complete one discipline at a time, attending for two weeks during a six-week period, i.e. the same rotation as in the drilling industry, to ensure that training can be easily combined with a full-time offshore job.

GODAC has concentrated on procuring the best instructors. In our experience, intern-based training is difficult to combine with a full-time job and family, and many people end up dropping out. Some kind of formal training is vital for a career in the drilling or well service industry. This requirement has been formalized by the OLF and the Norwegian Shipowners Association, and is a prerequisite for promotion to all positions above Derrickman.

Many people also find that studying at a technical college is the decisive factor in obtaining a permanent offshore job - the goal of the majority of students who complete the Basic Course in Drilling and Well Service Technology.

SPECIALIZED COURSES

GODAC can provide many different technical courses relating to drilling and well services, including:

- * Stuck Pipe Prevention courses
- * Drilling in Deep Water
- * Basic Pressure Control
- * Pressure Control Workshop
- * Wireline with Practical Training
- * HP/HT courses
- * Drilling and Well Control Simulator courses
- * Drilling Technology for Office Personnel

GODAC MANAGEMENT & ADMIN SHORT COURSES FOR PROFESSIONALS

- * Introduction to the Petroleum Industry for Professionals
- * Introduction to Land and Offshore Drilling
- * Casing and Cementing
- * Mud for Drilling Systems
- * HR Management in Oil and Gas
- * Health, Safety and Environment
- * Production and Transportation
- * Logistics in Oil and Gas
- * Well Control with Simulator
- * Exploration, Field Development and Production

The above is normally a 5-10 day program per session; however each session can be delivered in 5 days if it better suits a client's schedule.

These courses are provided on request. It is also possible to purchase an entire course at a fixed price.

Our Instructors know what it means to work in the petroleum industry

Working in the oil and gas industry is a demanding job, and offshore personnel need training that prioritizes quality, safety and high level of technical skill.

Our highly qualified instructors have worked in different positions on the drilling platforms and have extensive experience in the oil & gas industry.

Most equipment and tools employed during training at GODAC are same as will be used in the real-life environment offshore.

Affiliation

GODAC is affiliated to NORTRAIN (Norwegian Drilling Academy) of Norway and Caledonian training of Aberdeen, Scotland who are accredited by the following organizations:

- * International Association of Drilling Contractors (IADC)
- * International Well Control Forum (IWCF)
- * Norwegian Oil Industry Association (OLF)
- * Indian Drilling Association
- ** National Accreditation Board, Ghana
- * ISO 9000: 2001

** *Professional courses of this nature is exempted*

High demand for Oil Rig Workers Worldwide

Course Content

GODAC is offering the International Association of Drilling Contractors (IADC) accredited Drilling and Well Service Technology Level 1

The program prepares delegates to work at various levels in the petroleum industry (offshore / onshore)

International Association of Drilling Contractors (IADC) Accredited Drilling & Well Services Technology, Level 1

“From the industrial platform of oil rigs to air conditioned designed offices, the oil and gas industry is confronted with a shortage of brawn and brains so severe that it threatens to stall exploratory and production growth around the world”

Quote:

Labor and Skill Crisis
Booz, Allan and Hamilton, June 2006.

The above quote shows that skilled workers of this kind are in higher demand all over the world. Personnel trained at GODAC have the required knowledge, understanding and good practical skills necessary to work in different positions on the rig.

Some of the benefits of working in the oil and gas industry include:

- * Earning excellent salaries
- * An excellent work schedule that allows for a great deal of free time off the rig
- * Excellent opportunities for promotion and career advancement
- * Career opportunities worldwide
