Protecting people and
their places

ABOUT US

Whether it's your home or business, taking steps to keep any premises secure is of critical importance.

Dealing with a break-in is one of the scariest, most stressful ordeals to face, but investing in high quality security throughout your property will help to deter and prevent criminal activity, keeping you and your possessions safe from harm.

Since 1988, AAI Security have provided reliable, modern and safe security solutions to London and the Home Counties, protecting thousands of homes and businesses.

We ensure a first class service to every customer, with a team of fully qualified technicians on hand to install, repair and maintain a range of security solutions to safeguard valuable goods and assets.

Our wealth of experience allows us to tailor a security system to the specific requirements of your property. We work thoroughly to secure every aspect of your home or business, from top quality intruder alarms to dedicated door and access control, CCTV systems and more.

Here at AAI Security, we have everything you need to protect any premises, including an exceptional aftercare service which brings you complete peace of mind for many years to come.

BURGLAR ALARMS

Burglar alarms are a must for any domestic or commercial property. Designed to protect against the threat of intrusion, the burglar alarms available at AAI Security are designed around the specific needs of your property, creating a robust security system that won't let you down.

Here is a brief look at the range of burglar alarms we have to offer:

▫ Residential Intruder Alarms

Home security should be straightforward, and our residential burglar alarms provide an effective, reliable and personalised security solution to any home, without any fuss. All of our systems are NSI (National Security Inspectorate) approved, and are designed around the requirements of your property - including pet-friendly systems to accommodate for wandering cats and dogs.

▫ Commercial Intruder Alarms

No matter what kind of business you're running, a commercial burglar alarm is crucial if you want to avoid costly losses or damages to stock and assets. We supply and install intruder alarms for shops, offices, warehouses and more, designed to deter and detect intruders with complete precision at any time.

▫ Wireless & Remote Alarms

A completely modern security solution ideal for keeping busy working environments safe and secure 24/7. With adaptable, remote response to any threat, these systems offer ultimate convenience for complete peace of mind at an impressive price.

▫ Monitored Alarm Systems

Best suited to properties containing sensitive or high value stock, assets and equipment, monitored systems provide dedicated 24/7 protection and rapid response to any threat. We monitor your system and can contact the key holder or police as necessary, ensuring swift action is taken to keep your property protected.

Why have a burglar alarm at your property?

Burglar alarms not only allow for quick, tailored response to any intrusion, they are also incredibly effective deterrents. The presence of an alarm system will make would-be intruders think twice, and the NSI accredited systems supplied by AAI Security ensure maximum security for any commercial or domestic property.

In the case of a break-in, you can't underestimate the value of a high quality alarm system, and we only offer the best here at AAI Security.

"AAI Security are my preferred choice in this field. From their engineers right up to their management teams they are always pleasant and ready to help. They offer an excellent service to our company"

CCTV

CCTV will strengthen the security of any property, providing you with an effective visual deterrent and a comprehensive recording and monitoring system to help prevent, identify and respond to any security concern at any time.

The modern CCTV systems offered by AAI Security are designed to suit your property. Whether you would like remote access from anywhere using your mobile, tablet or computer, or would prefer to have the system monitored for you by our professional team, our CCTV systems have something for everyone.

Why have CCTV at your property?

Our digital CCTV systems offer extensive, high quality HD recordings for you to access at any time. This is critical should evidence be needed after a break-in, helping to identify any intruders as well as informing

you of any weak spots in your security system that you might not be aware of.

CCTV systems can be installed to suit the specific nature of your property, providing clear visual coverage of any room or area, and are ideal for enhancing the security of specific access points you might otherwise have concerns about.

Homes, shops, offices and industrial premises can all benefit from the presence of CCTV. It allows you to keep an astute eye on your property at all times, providing peace of mind even if you're away for an extended period of time, and can help reduce insurance premiums - making them an incredibly cost effective part of your overall security system.

ACCESS CONTROL

Implementing access control throughout your property allows you to determine who is and who isn't allowed into different areas of your building at any given time.

Whether you have certain rooms, hallways or spaces you would like regulated, or if you wish to limit access to your entire property as a whole, the access control systems at AAI Security are a reliable alternative to traditional lock and key systems.

"I have used the services of AAI for the last ten years and have found them to be totally professional, reliable and at the forefront of both installing state of the art and up to date equipment and knowledge and expertise of all the latest standards and compliance requirements. I would not hesitate to recommend their services."

Why have a Access Control at your property?

Access Control is particularly useful for busy working environments, such as offices, where heavy foot traffic is constant throughout. Regulating access is important if you want to eliminate cases of unauthorised access, and boost the security of specific rooms or areas.

Our access control solutions are catered to your requirements; our team of experts will survey your property and judge the most suitable access control system for your particular building.

The latest systems allow you to see and talk to visitors before you decide to let them in - this alone will dramatically strengthen the security of your property, keeping uninvited or unauthorised visitors out of your property with ease.

Access control is the most efficient way of regulating entry to any property. Only those with the correct identification or proper credentials can pass through, giving you complete peace of mind without interfering with the operation of your business.

DOOR ENTRY SYSTEMS

Door entry systems allow you to block unauthorised entrants right at the front door, keeping your property safe from intrusion in the simplest, most efficient way possible.

AAI Security supply and install a range of door entry systems to keep your home or business secure, while offering a dedicated aftercare service to keep systems running at optimal levels at all times.

Why have a Door Entry System at your property?

Door entry systems allow you to screen visitors remotely, allowing you to judge who is and isn't granted access without fear of confrontation. This allows you to keep unwanted visitors at bay, while actively preventing intruders from gaining access to your property - particularly helpful to homeowners.

For offices and businesses, door entry systems are incredibly convenient and flexible. Keypad entry and swipe card access means only those with previous authorisation can enter the premises, while visitors must be granted permission to enter.

These systems also prevent unwanted access in the event of lost or stolen key cards, as the card can be instantly removed from the system, rendering it inoperable.

A door entry system helps to make movement in and around your property much more efficient. You can regulate entry to specific rooms to help protect more valuable items, goods or assets, and every system is simple and quick to interact with for personnel - making areas which experience heavy foot traffic easy to navigate.

"Can't recommend AAI enough, very professional, reliable and knowledgeable. I manage properties and have used many different companies in my time who would often let me down. Have yet to find a company who can match AAI."

CONTACT US

Here at AAI Security we are dedicated to providing a first class service to every one of our customers.
