

Powerful and secure online management of audit records, issue resolution plans, compliance evidence, policies & procedures, and much more!

Seamless integration with InPlace

Smart Audit and Compliance Management

- ✔ Flexible platform for creating secure, cost-effective online Audit Programs
- ✔ Streamline end-to-end audit workflows, processes, and tasks
- ✔ Centralised Software as a Service (SaaS) model enables multiple education institutes to share results in an Audit Program
- ✔ Standardise audit methodologies with government and compliance templates
- ✔ Eliminate manual paperwork, and gain real-time access to audit results, evidence, policies & procedures, and more

InPlace Audit was created to assist organisations manage an ever-increasing compliance burden of regulatory and reporting requirements.

Gain visibility and control over your entire Audit Program in one place!

Design your own audit templates, or choose from an included range of government and regulatory templates to capture:

- Duty of Care Obligations,
- Occupational Health & Safety standards
- Quality standards associated with education, training, assessments and learnings.

Benefits

Centralised repository securely stores all audit records, action plans, evidence, policy and procedures

Build an audit history of agencies; record all identified issues and risks (e.g. non-compliance)

Perform key tasks such as audit scheduling, follow-ups, action planning to resolve identified issues, and more

Pre-populated, built-in modules based on globally accepted standards and criteria (i.e. ISO 45001, ISO 27001, ISO 9001)

Application Programming Interface (API) for institutes on the InPlace platform to interact directly with InPlace Audit

Improve your auditing program through better management of compliance & risks
