

An in-office experience  
wherever you need to work  
on any device

## Mitel MiCollab

Keeping people connected  
and productive - anytime,  
anywhere, on any device

### COLLABORATION MADE SIMPLE

Mitel MiCollab makes it easy for your employees to communicate how and where they need to.

With direct access to secure and reliable collaboration, mobility and messaging tools, employees have a consistent collaboration experience from any device - regardless of where their day takes them.

### ALL THE TOOLS YOU NEED

Each Mitel MiCollab service works seamlessly together to enable your employees to effortlessly communicate and collaborate with colleagues, customers and partners. Whether your business is large or small, MiCollab delivers the kind of cost-effective capabilities needed to:

- Increase productivity
- Build competitive advantage
- Help drive business success

### IN OFFICE EXPERIENCE ANYWHERE

MiCollab provides your employees with more options for collaborating. Simply choose the method that works best given the reasons for meeting, the people involved and their locations and the timing, from:

- Instant messaging
- Voice
- Desktop video
- Web-based collaboration

More details overleaf...

# Mitel MiCollab

## The MiCollab Client

The MiCollab Client provides a single access point for all your business communication and collaboration needs. It enables real-time access to collaboration capabilities by everyone in your organisation, regardless of location or device.

Workers enjoy the same intuitive communications management they would experience in the office from a remote PC or laptop with an embedded software-based IP phone.

### Presence

Know whether people you want to contact are on the phone, away from their desk or available for a video call, instant chat or other collaboration session.

### Messaging

Includes visual voice mail with presence information on the person who left the message and a range of options for dealing with the message.

### Mobility

Installed as a client on supported BlackBerry, Android and iOS devices, key collaboration features are extended to mobile users of all kinds.

### Video

Place a point to point video call with the click of a button, whether for a scheduled collaboration session or an impromptu brainstorm.

## Unified Messaging and Speech Auto Attendant

Unified messaging enables people to manage voice, email and fax messages from their personal phones and devices. Its features include voice, text and fax message retrieval, Outlook client plug-in with a tool bar to manage voice messages and hands-free message navigation such as play, forward, delete and keep.

## Audio, Video and Web Conferencing

This comprehensive audio conferencing and web interaction application improves collaboration and information sharing. Its features include; scheduled and ad hoc conferencing and webinars, participant management, desktop and application sharing, multi-point video conferencing, file transfer and conference recording.
