

## EcoEnergy Insights Poised for Impressive Five-Year Growth in the Building Energy Management Systems Market (BEMS)

*High Growth Market Driven by IoT, AI and Big Data*

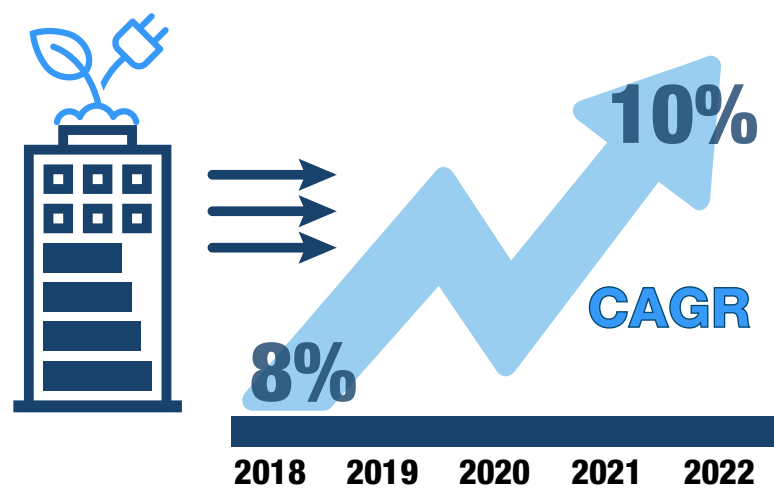

Three business models are driving **growth opportunities** for BEMS market participants looking to **compete vigorously in the market.**

**IoT-Enabled Building Services**

**Data Analytics & Cloud**

**Customer-Centric Business Models**

The **BEMS market** projected to achieve **double digit growth** over the **next five years**, driven by **energy efficiency and sustainability.**

EcoEnergy Insights' platform called **CORTIX** brings **Artificial Intelligence to BEMS**, which plays a **significant role in data-driven maintenance** by performing **three core operations:**

**Anomaly Detection & Prevention**

Detecting and preventing the problem

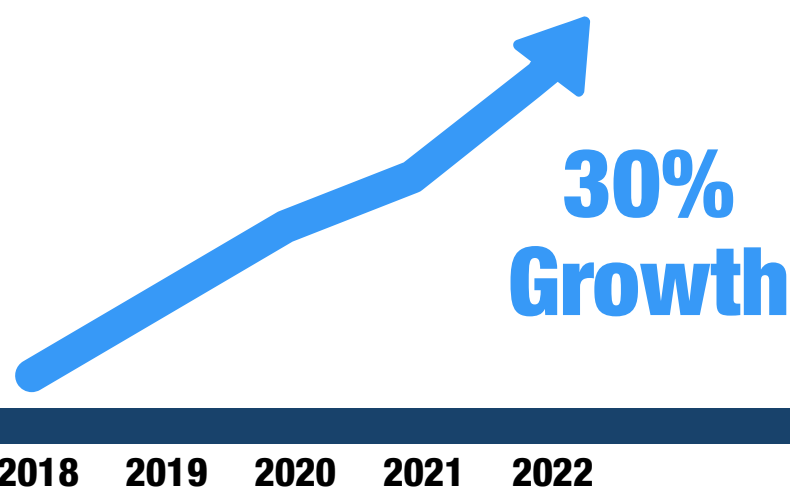

**Fault Diagnostics**

Finding out the root cause of the problem

**Outcome-Based Actionable Intelligence**

Converting data into energy and cost savings

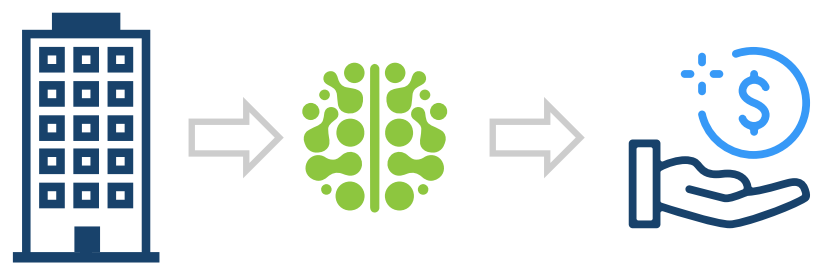

EcoEnergy Insights, under UTC ownership, demonstrated **strong market success** and **excellent service execution** and is poised for **exemplary future growth of more than 30%** by leveraging the opportunities Frost & Sullivan identified.

EcoEnergy Insights' energy management service **adds value** to its customers' bottom lines by **delivering tangible outcomes in a cost effective manner.**

EcoEnergy Insights stands apart from all other competitors by offering its **customers value-driven services** delivered through **knowledge-based operations** and **data-driven maintenance.**

EcoEnergy Insights is dedicated to increasingly utilizing automation through machine learning across all operations so that it minimizes human intervention and adds significant value to customers.

**If you are you looking for an intelligent, integrated, and value-based BEMS solution, contact EcoEnergy Insights in one of our three main geographies.**
