A great opportunity to add beauty and value to your property

## Timber Windows, Doors and Conservatories – A 'solid' Opportunity

With more and more homeowners turning to traditional materials for use on their properties either through choice or through planning and conservation requirements, we have a great quality suite of products to suit your every need from our Standard & Premium timber ranges.

# Standard Range

## Vertical Slide & Tilt Windows

This ingenious vertical sliding sash design provides high performance within a traditional stepped sash and frame design. Its unique track tilting mechanism with retaining arms permits safe cleaning of external surfaces of glass from inside the building.

## Vertical Sliding Sash Windows

The Vertical Sliding Sash window (cords & weights or spiral balance) offers the best of both worlds - the appeal of traditional construction and styling combined with the benefits of modern timber technology. The result is a high-performance window that is ideal where aesthetic values are critical.

## Dual Swing Windows

The Dual Swing window has been developed to meet the demands of contemporary styling, having the appearance of a traditional sash window whilst conforming to current building regulations. The Dual Swing window can also be used as an alternative to traditional Vertical Sliding Sash windows.

## Energy Plus Windows

The Energy Plus window is designed and engineered to meet the exacting demands of the latest Secured by Design standards. It has successfully resisted opportunistic and sustained attack in some of Britain's highest crime areas.

## System X Windows

System X windows are a "flush fit" high performance, top & side hung fully reversible window allowing the specifier to use a common profile to configure six different window operations. This Norwegian style window complies with the latest building regulations for fire escape & thermal performance.

## Aluminium-Clad Windows

This product complements our range and having a powder coated external face that has a paint finish that will last up to 40 years. Helping to reduce cyclical maintenance and keep down costs, whilst on the inside you maintain the inherent beauty of timber offering clients the "best of both worlds".

## Tilt & Turn Windows

The popular Tilt and Turn window is a classic design that allows windows to be creatively specified in unusual shapes with no compromise in performance, security or durability.

## Entrance Doors

We can offer clients a plethora of choice with regard to colour and style, giving your clients greater freedom of choice. We have developed innovative doorsets that meet their needs and fulfil the most exacting demands of performance, longevity, value and aesthetics.

## Sliding Patio Doors

Available in a wide range of colours they also have a section detail that complements that of our window range thus not having different section details on your customers properties.

## French Doors

These French doors have been developed in line with our successful high security/high performance external doors. Utilising the same tried and tested quality materials and components, as well as incorporating their high quality ironmongery and fittings. Offered with virtually unlimited fanlight and sidelight coupled 'units', or as a stand alone French door-set.

# Premium Range

## Flush Fitting Casement Windows

The Flush Fitting Casement is a highly attractive window designed for conservation needs as well as for projects that require modern performance with a traditional look. The flush appearance of the sash sitting within the outer frame gives the window clean, unobstructed lines.

Whilst traditional in appearance our made to order flush fitting windows benefit from modern technology in the form of warp

resistant engineered timber, multipoint locking with night vent position, ventilation grooves, drainage channels and high performance, energy saving double glazed units.

## Stormproof Casement Windows

Our high performance Stormproof windows advanced design and manufacture guarantees a long life of hassle-free use and provides superior levels of stability, security, insulation weathering and glazing performance.

Available in a range of knot-free engineered redwood, our stormproof windows are made to order to suit your project and internally beaded for security and utilise a modern multi-point locking system to all opening sashes. The windows are factory fitted with stainless steel friction hinges and the frames fitted with a high specification draught seal and factory glazed with argon gas filled sealed units comprising soft coat energy saving glass.

## Entrance Doors

Our modern range of high performance doors provide a stunning focal point of quality to any refurbishment or development project.

Manufactured to order, our doors are factory glazed with argon gas filled sealed units comprising of soft coat energy saving glass and aluminium spacer bar.

Special features include door sashes fitted into the door frames and a secure multipoint locking system fitted as standard. There is also an attractive range of ironmongery and furniture options available to help create the final distinctive finish.

A wide range is available, modelled on designs typically found in homes of quality across the country.

## Patio Doors

Our exceptionally smooth gliding patio doors are available in two, three, four or six pane options. Since each pane may be manufactured up to three metres wide, our six pane doors are capable of spanning widths of up to 18 metres (60 feet).

Horizontal sliding patio doors suit a contemporary design scheme and are also ideal where space is at a premium.

## French Doors

Double opening French doors are available outward or inward opening to meet your requirements and are manufactured to order in engineered redwood. The master door is fitted with multi-point locking mechanisms to Association of British Insurers approved standards featuring hook bolts and deadlocks. The French doors are factory glazed with gas filled sealed units and available in a variety of styles which are also fully factory finished.

## Bi-folding Doors

Our range of bi-fold doors have been designed with performance and space saving in mind. Open-in or Open-out, the doors stack completely to the side to allow complete opening of the aperture. Attention to detail in terms of drainage and weathering ensures that even during the worst weather conditions you can be confident they will perform well.

The doors are available fully factory finished in a range of paint or stain finishes and are made to measure to suit your project so you can be assured of a perfect solution and fit.

We also supply a range of bespoke conservatories and orangeries
