Gicleé – the production of a digital fine art print combining a style and refinement praised by creative people in fine art and photography. At PHMedia we use the latest Epson professional Inkjet proofers.

Our paper is hand-picked from a professional range with an archival life of 80 years daylight and 200 years dark. The suitability of the Fine Art Poster Hahnemühle Pearlstock is perfect for colour and B/W photography, literally turning photography into art. This particular stock with a pearly gloss finish produces the touch of genuine art paper and is very popular among photographers.

The impressive contrasts and spatial depth obtained, achieve dynamic colours when printed direct from the original RGB file.

Our paper is hand-picked from a professional range with an archival life of 80 years daylight and 200 years dark. The versatility of the Fine Art Poster Hahnemühle Pearl stock is perfect for colour and B/W photography, literally turning photography into art. This particular stock with a pearly gloss finish produces the touch of genuine art paper and is very popular among photographers.

The impressive contrasts and spatial depth obtained, achieve dynamic colours when printed direct from the original RGB file.

# A2 3D SCANNING

# PHOTOGRAPHY

Original artwork is scanned by our WIDETEK 25 A2 3D scanner. Its key features ensure industrial quality of contours of medium surfaces, for example, oils, textiles and flat surface art such as watercolours.

The photograph scanning area has a size limit of 635 x 470 mm (25 x 18.5 inches). Above this it will be necessary to photograph the artwork using a high resolution full frame camera in our studio. Colour calibrated lighting and monitors implement accurate viewing conditions ensuring perfect reproduction.

# A2 3D SCANNING & PHOTOGRAPHY

Original artwork is scanned by our WIDETEK 25 A2 3D scanner. Its key features ensure industrial quality of contoured medium surfaces, for example, oils, textiles and flat surface art such as watercolours.

The flatbed scanning area has a size limit of 635 x 470mm (25 x 18.5 inches). Above this it will be necessary to photograph the artwork using a high resolution full frame camera in our studio. Colour calibrated lighting and monitors implement accurate viewing conditions ensuring perfect reproduction.

Select your prints from the images we hold, or provide alternatives for us to prepare for Print On Demand (P.O.D.) without cost.

We've also asked our website developers to provide the facility to allow a remote set up 'shop' on YOUR site to make it simple....

For a low initial fee, your magazine shop is up and running with PHMedia fulfilling orders and paying you as a publisher monthly to reflect orders taken. Contact us for more information.
