

NV-CTI

Thermal Night Vision

KEY FEATURES*

- Internal Display 800x600 OLED
- 40° FoV (matched to image intensifier)
- High Res : 64 lp/mm
- Xti Shutterless Technology
- Integrated IR Illuminator
- Lightweight, compact and rugged waterproof construction for the harshest environments
- MIL-SPEC
- Head, Helmet, Weapon or Camera mountable

Fused night vision is the new standard for low light operation. NV-CTI is an immediately usable mission-ready device with a fast attachment & quick release mechanism as well as an easy-to-use on-screen menu. All functions/modes are quickly and simply accessed via a single control wheel specifically designed for left and right handed users even when wearing a gloves.

NV-CTI provides users with the unparalleled detection capabilities of thermal imaging as well as superior identification capabilities of image intensification in the most advanced image fusion available today.

NV-CTI can be hand held, head or helmet mounted for hands free operation. For surveillance and reconnaissance the combined technologies of the NV-CTI can also be camera configured for optimal broad spectrum coverage.
