Cyber Liability Services Overview

Are you up to date on the latest cyber-attacks and other industry news?

To protect their bottom lines, organisations must stay up to date on the evolving threats to their IT infrastructure and data. Whilst the constant stream of information on cyber-risks can be overwhelming, D2 Corporate Solutions Ltd is here for you.

Do you know all of the cyber-exposures that your organisation faces?

Organisations, both large and small, need to be proactive in order to protect against growing cyber-threats. Resources like our Cyber Risk Exposure Calculator and Cyber Liability Toolkit ensure that, regardless of how you conduct your business, you are doing the due diligence necessary to prepare for your organisation's unique cyber-exposures.

Do your employees have all the training that they need?

Properly training your employees is one of the easiest ways to prevent a cyber-breach from affecting your business. However, because cyber-security is a complex topic, thoroughly training all of your employees is not always easy. Simplify the process by using our comprehensive employee training materials.

Resources

We know you want to be sure that you can say 'yes' to all of the above questions, so we've put together some resources that you can use to reduce the risk of a cyber-attack affecting your organisation.

Cyber Liability Toolkit

Understanding the full scope of your cyber-liability is a challenge that requires knowledge of various types of breaches, common risks, exposure identification strategies and mitigation techniques.

Using our Cyber Liability Toolkit, you'll find in-depth information on all of the above, allowing you to better protect your business, data and customers from cyber-threats.

Cyber Newsletters

Written for employers, our Cyber Risks & Liabilities newsletter features information about new technology risks and tips on how to stay cyber-safe. This resource is especially useful for SMEs as well as IT and risk management professionals, as it features articles that highlight important current events and provides valuable cyber-security advice.

Cyber Risk Exposure Calculator

When data breaches occur, they can result in devastating damage, such as business disruptions, revenue loss and legal fees. No organisation is immune to the impact of cyber-crime, and cyber-liability insurance is a crucial part of risk management. Use the Cyber Risk Exposure Calculator to assess your organisation's cyber-risk level.

Employee Training Materials

The first line of defence against cyber-threats is a well-trained workforce. Educate your employees on common threats and mitigation techniques with the Employee Cyber Training Manuals. These guides cover a range of topics, including communications, devices and best practices.

Cyber Risks and Liabilities Series

It seems as if new information regarding cyber-risks emerges every day. From a business standpoint, this can make it difficult to stay informed on the most important and dangerous exposures. Our Cyber Risks & Liabilities series hones in on specific risks to provide a detailed look at how organisations can approach common
