Things to consider when completing your intercooler drawing:

- *Intercooler dimensions - Length, width, height. End tank size and core size.*
- *Pipework - Position, sizes and angles of inlets and outlets*
- *Mounting - Position and type – brackets, pins, bosses (M8 works well)*
- *End tank shape - Square, sloped tube, custom, curved, staggered core.*

Bear in mind:

- *We can make replica intercoolers from patterns or drawings*
- *We can sometimes re-core intercoolers especially where they have complicated cast end tanks.*
- *We sell fans*
