## Lepide Exchange Recovery Manager

Lepide Exchange Recovery Manager provides you with all you need to repair broken EDB files, extract EDB files from backups, restore OST files and repair corrupt information stores. It also allows you to carry out granular mailbox level repair, recovery and exports and even helps you migrate the contents to an alternative Exchange or Office 365 server.

Exchange Recovery

- Instantly repair, restore and recover your Exchange servers
- Quickly convert EDB files to PST files while bypassing the 2GB file size limit
- Easily export EDB to a wide range of file types including EDB to PST, EML, MSG, RTF, TXT and HTML.
- Simple to install with no agent required
- Export from on-prem Exchange and Office 365 to PST

- Simple to extract attachments and EDB files from a variety of sources
- Perform in-depth searches even in attachments' body and previews prior to recovery
- Easily migrate mailboxes and Public Folders to a variety of destinations
- Simplify migration from on-prem Exchange to hybrid cloud environment or Office 365
- On-prem Exchange to on-prem Exchange migration
