

# Keyflow Nurture<sup>®</sup> Pro

## Pre-digested Stud Balancer

### Perfect for:

- Supporting and balancing a pasture based diet for stud horses
- Use as a performance balancer for competition horses
- Dry Mares, In-foal Mares and Lactating Mares
- Foals and Weanlings
- Yearlings and Yearling Prep
- Stallions and Performance Horses
- Any horse that requires musculature development growth

### Key Points:

- Pre-digested by steam extrusion, ensuring maximum nutrient absorption.
- Molasses free, low in sugar & starch
- Contains long chain omega 3 DHA to support semen motility, mare postpartum recovery and foal feeding behaviours and development.
- Highly palatable large nuggets that can be easily eaten off the ground
- Designed to be fed alongside pasture, or to top up an existing Keyflow<sup>®</sup> ration
- Contains unique protein sources for exceptional musculature development
- Carefully balanced amino acids in a unique profile matched to the equine supporting quality lean muscle and skeletal growth and development.

Fully Steam Extruded

DHA Omega 3

Low Sugar & Starch

Concentrated Balancer

EQ-Amino Pack

## Product Summary

**Nurture<sup>®</sup> Pro** has been scientifically formulated to support and balance a pasture based diet for equine stud animals. It can also be used as a balancer for performance horses and horses that require muscular development. Nurture<sup>®</sup> Pro is made using steam extrusion to ensure maximum nutrient absorption. This highly palatable balancer is free from molasses, so it is low in sugar and starch. The large nuggets are designed to be easy to pick up off the ground, chew and digest by horses of all ages.

### Ingredients

Pressure cooked and fully steam extruded protein meals, (inclu. hiprosoy, rapeseed, pea), steam extruded cereal & omega 3 meals (inclu. linseed, rapeseed & wheat), cold pressed rapeseed oil (omega 3), heat stable vitamins & chelated minerals, vegetable source DHA (docosahexaenoic acid).

### Analysis

Energy De	13.5Mj/kg
Starch	12%
Sugars	4%
Protein	30%
Oils	8.5%
Fibre	8%
Ash	13.5%
Copper	217 mg/kg
Vit A	60,000 IU/kg
Vit D	6000 IU/kg
Vit E	1800 IU/kg

### Daily Feeding Guide

Dry mares, In-Foal Mares, Foals/Weanlings, Yearlings  
2YOs and Stallions  
150-200g per 100kg of b/w

Lactating mares  
100-250g per 100kg of b/w

Added to existing Keyflow Rations  
50-200g per 100kg of b/w

Feeding Guidelines: Introduce Nurture<sup>®</sup> Pro into the diet gradually over a minimum of 7 days, dietary changes should be made gradually. Total roughage offered should be between 1-2% of bodyweight daily. Fresh clean water must be made available at all times. Feeding quantities above are a guide only, Nurture<sup>®</sup> Pro should be fed as part of a balanced diet.
