IRS Plus

A powerful, advanced incident recording system designed to save users time and improve accuracy of data.

It is well known that incident recording is essential for FRSs. IRS Plus provides you with the ability to customise your questions to the incident data you want to collect and record it in a way that suits you. Information that is pertinent to your FRS or information you require for specific initiatives can be added or captured.

At a glance...

1 Own your own data

2 Accurate reporting guaranteed

3 **100%** user friendly

4 Regular remote upgrades

5 Customisable to your needs

Saving you time and money:

Simplicity guaranteed
easy to use means less training

Complete transparency
price based on number of incidents

Total control
own your own data to make your own reports

Absolute flexibility
complete sections in the order you choose

Improving the accuracy of your data:

End to end data
integration into your existing systems

Built around the user experience -
fast, easy data entry

Geo-verification and mapping integration
our software does this so you don't have to

Customise the questions to suit you
putting you in the driving seat

Mission Critical Software

Delivering software solutions which, through our customers, make a **positive difference** to people's lives.

IRS Plus and your systems:

Facilitating better information awareness across organisations is becoming more and more important, and insuring accuracy of transferred data is critical. Here's how our IRS Plus system interfaces with your systems to provide fast, accurate data:

IRS Plus integrates with your existing web based mapping system or other applications providing added value to your infrastructure for incident geo-locating.

Interface to your existing CAD system to ensure fast and accurate data transfers. Bespoke interface development available if required.

Send incident data directly to IRS Plus to save time and improve accuracy by pre-populating certain fields

Third party systems e.g. Fire Safety, Risk Assessment etc.

IRS Web Server

IRS CAD Web Service Interface XML/SOAP

HTTP/HTTPS

IRS Users

FRS Network

Existing Command and Control System

Geode Web Server

IRS Database Server

Designed to ensure an incident address is accurate and improve the quality of data entry

Web based clients can access the system from their work stations

Our IRS Plus customers

> " The decision to use IRS Plus was based on the ability to store all our data in-house which would allow us to continue to underpin our IRMP planning process with robust incident data. "
