The APC BF100 - Biometric Fingerprint-Reader

The APC BF100 is the latest in Biometric technology with many useful features for Access Control and Time and Attendance and it's also easy to install.

Our Biometric fingerprint readers are a versatile, reliable and modern product, with most fingerprints matched in under 1 second you can be sure that this technology won't slow your building access down.

The APC BF100

Benefits

- **Safer sites** - You no longer have the problem of staff loosing their swipe card. If a member of staff leaves the company, you just delete their fingerprint.
- **Quick operation** - Matches staff fingerprints in under a second.
- **Full reporting** - Keep track of where staff enter and exit buildings.
- **Time and attendance** - Can be used for full time and attendance, with reports and time sheets.
- **Access Control** - Full access control functions with logs and reports.
- **Direct replacement** - Replace existing door controllers quickly and easily using the Wiegand output.
- **Compatibility** - with Paxton Access software and door controllers.
- **512 / 1000 / 2000 Users** - Cover all of your staff or visitors (Depending on model).
- **Flexible Use** - Networked or Stand-Alone.
- **Proximity Cards** - For additional flexibility you can issue standard proximity cards to users.

Uses of the APC BF100

Office / Factory - Time and attendance and Access Control.
Remote site (Via Web) - Staff time and attendance monitoring.
Secure Building Sites - Monitor contractor staff attendance and control access through Turnstiles.
