

Stone goes to work.

Lasting inspiration from Montreal

ARBORITE[®]

Our urban stone looks are easily integrated into hospitality and retail projects. In areas where cozy and homey looks are welcomed, our urban stones provide a comfortable yet modern feel. These surfaces are a natural choice for accent tables, conference tables and reception areas. They are also perfect for office breakrooms or cafeterias. Laminates are easy to maintain, unlike real marble and concrete, and are budget friendly.

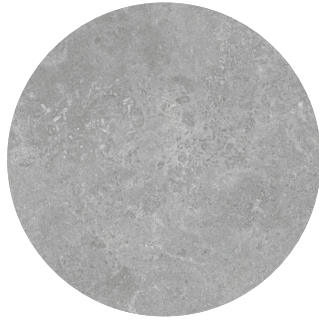

Our new stone laminates are perfect for contract, hospitality and retail projects. Seen here are tables in Carrara Venato (P1015) and counter in Cityscape Loft (P1010).
