The highest gel strength agarose available (>1800gm/cm² at 1% gel) giving good handling properties at low gel concentrations. Applications include separation of high molecular weight nucleic acids, viruses, and ribosome's. Can be used for a broad range of fragment sizes by modifying the gel concentration.

Hi-Pure™ (Low EEO) Agarose

Use for gel electrophoresis. A cost effective, high strength, multi-purpose agarose.

Hi-Pure Ultra™ (Low EEO) Agarose

Use for both analytical and preparative electrophoresis, RNA separation, Southern and Pulse Field Gel Electrophoresis (PFGE).
