

# Management Policy

MWA Technology Ltd is committed to providing the quality of product and service that is demanded by our customers.

We are committed to minimising our impact upon the environment and to reducing pollution.

We comply with all legal and regulatory requirements of the United Kingdom.

Through management objectives, internal audits, management review meetings & correction of any fault, deficiency, customer complaint or audit nonconformity we continually improve our IMS.

Our top management supports this policy by encouraging all of the above, by providing training, and by having a policy of freedom of communication at all levels of the organisation, and to the public.

This policy will be reviewed at each management review.
