

A COMPANY DEI
EXPERIENCE

&

A UNIQUE
VALENTINE'S EVENT

EVENT OVERVIEW

Dining in the Dark simulates an experience of visual impairment during an array of activities. Attendees will have the opportunity to engage in sensory experiences such as blind wine and bourbon tastings, as well as blind aromatherapy. At the conclusion of all sensory experiences, guests will enter a dimly lit dining room, where the gourmet chef and representatives from the Lighthouse will share insights into the challenges of dining while blind or with a visual impairment. Guests will then blindfold themselves and enjoy a sumptuous three-course meal. After each course, guests will remove their blindfolds while hosts discuss the food and the dining experience in tandem.

A DEI EXPERIENCE & A UNIQUE VALENTINE'S DAY DINNER

Dining in the Dark will have two segments with the same mission: to support the San Antonio Lighthouse. Diversity Equity Inclusion Experience guests will dine together in one space hosted by the Lighthouse's first blind CEO, Cindy Watson. Individual ticket holders and couples will dine together in a separate space hosted by Lighthouse Transition to Work Supervisor, LaKisha Holmes, and her partner, Axel, both of whom are blind.
