

PRODUCT SPECIFICATION - APPLICATION & USE

PRODUCT NAME: **DISPOSAFE**

GENERAL DESCRIPTION: A fine brown fibrous powder.

USE FOR WHICH PRODUCT IS INTENDED: To absorb pillages of oil based chemicals on either land or water.

SPECIAL EQUIPMENT REQUIRED: For use on water a funnel boom and a suction device may be required.

METHOD AND CONDITIONS OF USE:

LAND USE:

1. Spread DISPOSAFE over the spillage until it turns a dark wet colour, continue to spread DISPOSAFE until all visible oil is absorbed.
2. Sweep into a suitable container for disposal according to local regulations.

USE ON WATER:

1. On still water spread DISPOSAFE as evenly as possible until the oil no longer shows through.
2. On flowing water use a funnel boom to concentrate the oil before applying DISPOSAFE.
3. Remove the saturated DISPOSAFE with a skimmer, sieve or suction device.
4. Place in a suitable container for disposal as for land spillages.

METHOD OF CONTROL: Add sufficient DISPOSAFE to completely absorb the spillage.
