

# Stainless Steel Metric Tubes

**Kloeckner Metals UK Stainless Steel Metric Tubes & Fittings are now available from stock.**

These tubular products provide a saving on weight whilst not compromising on quality & performance. Our tubes are manufactured to EN standard and are produced in accordance to the highest quality testing to ensure safe use in a variety of process applications.

These process tubes are often used in applications such as:

- Paper & Pulp
- Construction
- Water
- Sewerage & Water Treatment
- Heating & Ventilation

Our range of tube products is available from 22 mm OD to 711 OD, in 1.5, 2.0 and 3.0mm thickness. We stock grades 304L & 316L. In addition some of our customers also use our Ex Mill production of Duplex stainless to add further performance benefits. We also stock a range of fittings to suit in elbows, tees, collars and flanges, eccentric and concentric reducers and zinc plated and coated carbon steel backing flanges.
