INSPIRATION AT WORK

VILLAGE

HOTEL CLUB

Founded in 1995 Village Hotels aspired to have hotel complexes on the outskirts of many of the significant cities and towns around the United Kingdom and have already made significant headway into achieving that goal.

Having been purchased by the KSL Group recently, Village have made a commitment to refurbishing the hotels with new furniture for bedrooms as well as meeting and breakout areas for business clients.

The Village team had a vision as to their ultimate design outcome and provided Compact Workspace with initial concepts and designs to illustrate how the finished products would look.

Compact Workspace developed these designs into workable furniture mock ups for approval. Having worked closely with Village with their design and finance team, the furniture was signed off as having achieved the look and the budgetary requirements for the projects and Compact Workspace was granted approval to create bedside tables, desks, two drawer storage units as well as the beds for each bedroom. We also undertook re-upholstery to some of the existing Village furniture to ensure it blended seamlessly with the new installation.

Not only that but we were also commissioned to create flip top meeting tables that included integral cable management to keep the style minimalistic and compliant with the Village concept style.

Compact Workspace has already successfully delivered the project across numerous Village hotel installations in the group.

The project was a huge success and our client said:
"We were pleased with what Compact Workspace developed for us. From our initial designs through to production and development has proven to be a positive journey with a successful outcome. The furniture has been installed on time and on budget and we would have no hesitation in recommending Compact Workspace to other businesses with similar needs."
