Fire escapes

Elite Spiral Fire Escape Stairs are available for both internal and external installation. We can manufacture to almost any height and type of building. Your Fire Escape will be produced to meet all UK Building and Fire Regulations and will be durable and customised to fit your situation.

We will offer help and advice on all aspects of your Fire Escape including compliance with BS 5395-2 so that you can be sure it will be the right one for your building and ground plan.

All our Fire Escapes are manufactured in our premises in Warwickshire which is centrally located for most parts of the UK.

It is worth noting that the Elite Victorian Cast Iron range of stairs and landing also comply with building regulations for use as a fire escape up to 1830mm diameter which is a category "B" stair.

If you would like your stair to have a more decorative and aesthetically pleasing design. It is also possible to change the plain round balusters to any of the decorative range supplied by Elite and still fully meet the required standards.

BS 5395-2 UK Regs summary		
Category	Diameter	Rise
"A" - Small private	1370mm	190-220mm
"B" Primary private	1830mm	190-220mm
"C" - Small Semi Public	2100mm	190-220mm
"D" Semi Public	2300mm	150-190mm
"E" Public stair	2500mm	150-190mm

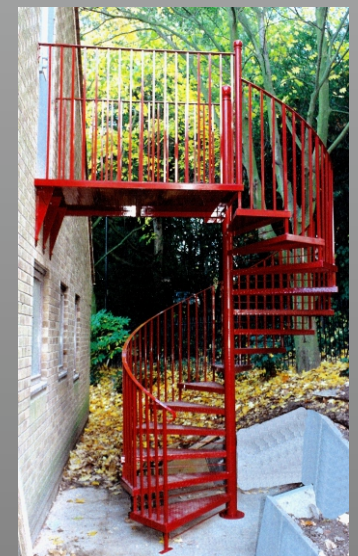

Elite fire escapes can be supplied untreated, hot dip galvanised, Spray painted (2 pack resin based process) or a combination such as galvanised and then sprayed to give a rust proof, highly resilient quality finish.
