

Tooling Intelligence SmartDrawer

SmartDrawer is a drawer based storage system designed to dispense single items or kit components from individually locked compartments. With over six hundred individual product locations available, the versatility of this fully configurable system makes SmartDrawer our most popular vending solution.

High capacity vending from a small footprint

Suggested Applications:

Cutting Tools • Fasteners • Abrasives • Adhesives
Sealants • Maintenance Supplies • Safety Equipment
Meters • Gauges • PPE • And many more!

Openings								

Configure your cabinet with 6 to 14 drawers of variable depths. Then, choose the lid configurations to fit your products. For extra high capacity storage, incorporate Single Box Dispenser II (SBDII) drawers within your configuration, for the management of mission critical inserts and everyday small tooling, in 128 locked compartments per drawer.

Having selected their chosen product from the easy-to-use touchscreen interface, flashing LEDs direct the user to the drawer and compartment containing their product. Alternatively, users can select products directly from the locked see-through compartments, using integrated Take and Return buttons.

Rapid Refill

Fast and simple restocking at the machine. No re-packaging necessary.

Remote Database Connection

Monitor every single transaction at the SmartDrawer from anywhere, 24 hours a day.

- Single or multiple item dispensing
