## Conflict Minerals Statement (Cobalt)

As an electronic passive component manufacturer, we require our suppliers to use conflict-free Cobalt minerals.

Our raw materials vendors have established specific supply chain steps and provide certifications that the Cobalt we use is conflict-free.

Fair-Rite conducts periodic reviews with our vendors to ensure that they are in compliance with this policy and we obtain certifications from these vendors that their Cobalt supplies are conflict-free.

Fair-Rite's raw materials are sourced from all over the world, including reputable global financial institutions. Based on our knowledge, we are confident that the Cobalt materials used in our manufacturing do not originate as conflict minerals.

In our vigilant environment, we work meticulously to insure that the Cobalt used is conflict-free. We continually monitor our supply chain to insure that this policy is strictly adhered.

Rich Eckmann  
Director of Quality
