

A large, glowing yellow lightbulb is positioned on the left side of the page, with several yellow lines radiating from it to suggest light or an idea.

Another brilliant idea...

ZOOM CONSERVATORY GLASS - RELAX 365

One day all conservatory roofs will come with glass. Zoom Ready is the first conservatory roof kit to be offered with glass as standard.

Conservatory glass is now the preferred choice for homeowners despite the extra cost because it enables them to use their conservatory all year round. When consumers are offered glass and the benefits are explained they usually choose to pay the extra and get full value from their conservatory.

The arguments for selling conservatory glass are clear...

- ✓ Conservatory glass enables conservatories to be used throughout the year. It's more expensive than polycarbonate, but it makes conservatories comfortable to be in when it's hot or cold. Consumers who buy a conservatory they can only use a third of the year are disappointed.
- ✓ Glass is quieter in the rain; it cuts more traffic noise.
- ✓ Glass lasts longer and with self cleaning glass the conservatory looks better for longer too.
- ✓ The different coatings and tints in glass cut the effects of harmful UV rays on furniture and fabrics.

What's not to like? The cost? The hassle of ordering glass separately? The potential for error when you order?

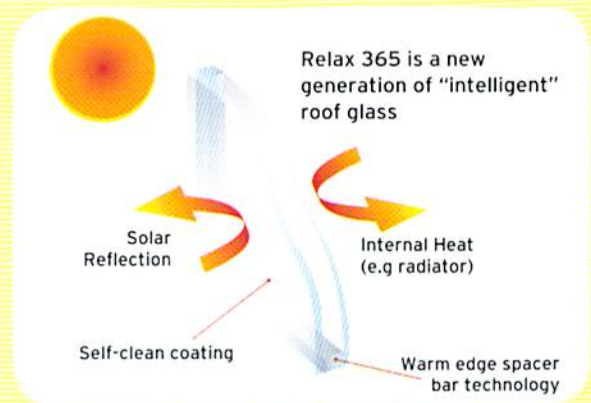

Zoom Ready roofs are sold fully glazed at a **surprisingly competitive price** - a complete solution that saves installers the complication of sourcing glass from an alternative supplier. You can of course have the roof glazed with polycarbonate, or unglazed if you prefer, but we've taken the work and potential for error out of ordering glass to make it easy for you.

Zoom Ready roofs with **Zoom Conservatory Glass - Relax 365** saves you time, hassle and money.

Zoom Conservatory Glass - Relax 365 reflects the high quality of the glass, and the comfort of all-year-round living to the homeowner. **Relax 365** is a new generation of 'intelligent' roof glass manufactured to our specifications exclusively for Zoom Ready.

Relax 365 units are made from top performing glass, argon gas or air filled depending on grade, warm edge spacer bar as standard and the option of true self cleaning glass.

Four Sealed Unit Options:

	External Glass (Self cleaning)	Internal Glass (Toughened)	Argon gas filled	Air filled	Warm Edge	Heat retention (U-value)	Noise Reduction (Decibels)*	Glare Reduction** (Light Transmittance)	Reduction in heat transmission***
Platinum	✓	Low-e	✓	✗	✓	1.0	29	42%	70%
Gold	✓	Low-e	✓	✗	✓	1.2	29	45%	64%
Silver	✓	Clear	✗	✓	✓	2.7	29	49%	56%
Bronze	✗ (3 tint options)	Clear	✗	✓	✓	2.7	29	60%	44%

* In a conservatory with any of these sealed units, external noise is reduced by 29 decibels. To put this in context, a normal conversation is approximately 60 decibels and a lawnmower can be 90 decibels or more.

** This is the extent to which the sealed unit reduces strong light and glare from the roof glass to create a comfortable living environment inside the conservatory. The % figure is an average for the range. The exact number varies with colour choice.

*** The higher the number, the more effective the glass is in reducing heat build-up from the sun. The % figure is an average for the range. The exact number varies with colour choice.

Six Tint Options:

	Aqua	Blue	Neutral	Bronze	Grey	Green
Platinum	✓	✓	✓	✗	✗	✗
Gold	✓	✓	✓	✗	✗	✗
Silver	✓	✓	✓	✗	✗	✗
Bronze	✗	✗	✗	✓	✓	✓

Zoom Conservatory Glass - Relax 365: all you need for great looking glass and comfort 365 days of the year.
