

Senior Full Stack Software Developer

Type: 6 month contract with longer term opportunity (ability to be part time or full time, 3-5 days/week)

Salary: R40-R60k depending on experience and time commitment

Reports to: General Manager

Location: Century City, Cape Town

Company and Job Description

BLOOMABLE is a fast-growing online marketplace for flowers and gifting in South Africa. Our e-commerce marketplace connects nearly 200 local businesses throughout the country, empowering them to expand their businesses by using our tech marketplace as their online hub. We're a company that focuses on building and using tech to support florists and artisans while ensuring an excellent customer experience for every purchase. Bloomable is backed by Newtown Partners, a venture capital firm that actively invests in emerging, disruptive technology startup businesses, founded and run by successful tech startup entrepreneurs, Vinny Lingham, and Llew Claasen.

We are seeking a lead .NET developer responsible for building .NET applications using C#, with a focus on both frontend and backend. The Senior Full Stack Developer will be the technical lead in the business and report to and work alongside the General Manager.

Responsibilities

- Lead the technical function and key technology decisions
- Design, build, and maintain efficient, reusable, and reliable code
- Ensure the best possible performance, quality, and responsiveness of applications
- Identify bottlenecks and bugs, and devise solutions to mitigate and address these issues
- Help maintain code quality, organization, and automatization

Essential Skills Required

- Strong knowledge of .NET web framework
- Proficient in C#, with a good knowledge of their ecosystems
- Strong understanding of object-oriented programming
- Skill for writing reusable libraries
- Familiar with various design and architectural patterns
- Knowledge of concurrency patterns
- Must have excellent understanding of database design & understand relational database concepts
- Familiarity with Microsoft SQL Server
- Experience with popular web application frameworks
- Knack for writing clean, readable, and easily maintainable code
- Support and maintenance of the existing application infrastructure
- Understanding of fundamental design principles for building a scalable application

- Experience creating database schemas that represent and support business processes
- Basic understanding of Common Language Runtime (CLR), its limitations, weaknesses, and workarounds
- Experience implementing automated testing platforms and unit tests
- Proficient understanding of code versioning tools such as Git, SVN, and Mercurial
- Proficiency with fundamental front end languages such as HTML, CSS and JavaScript
- Experience with Visual Studio for front end changes
- Experience using Elasticsearch
- Experience using a cloud-based hosting provider platforms (AWS, GCP or Azure)

Qualifications & Experience

- Degree, diploma or appropriate qualification in Computer Science
- Minimum 5 to 6 years' experience
- E-commerce experience preferable
- Technical SEO experience preferable
- Must be keen to work in a start-up environment and be able to work under pressure and meet deadlines

Other Skills/Abilities

- A commitment to collaborative problem solving, sophisticated design, and quality product is essential
- High fluid intelligence (problem-solver), inquisitive and innovative
- Strong organizational and project management skills
- Good verbal and written communication skills and be able to communicate effectively with fellow non technical team members
- Ability to write clear and concise technical documentation
