

HXCC River Conditions Indicators

to be used in conjunction with the HXCC River Conditions Policy

	Description	Example
GREEN	Water up to the top of the weir at the top of the white water course (water going through low points in weir only)	
AMBER	Water going over the full length of the weir at the top of the white water course AND water no higher than the top of the white line painted on brick pillar by the white water course egress steps.	
RED	Water above the white line painted on brick pillar by white water course egress steps, and below the bottom metal step	
BLACK	Water up to or covering the bottom metal step on the white water course egress steps is considered to be a maximum safe level to be on the white water course.
