

*Hello and thank you for
choosing a **Weezle***

*To help you get the best from your
purchase, a few words of advice.*

*Wear as little as you dare beneath
your Weezle Undersuit. This
enables the inner TS1 layer to do its
job more effectively, wicking
moisture from the body.*

*Keep your Weezle free from salt
and talc by regular washing,
following the guidelines sewn into
the inner side seam. Use a front
loader washing machine or hand
wash to extend the life of your
Weezle. A non-biological soap and
no conditioner is ideal with a quick,
cold wash & short spin. Hang the
suit on a hanger to dry and it likes
to be stored for long periods like
this too.*

*Zips will work better and last
longer with the help of a LITTLE
silicon applied to the 'slider'.*

*We hope you enjoy your purchase &
grow to love your Weezle. If you
have any queries, check the web site
or contact us.*

Paul & Hilary Child

The Company

*The desire to be warm & dry while
underwater and a frustration with
existing equipment has been the
driving force behind the conception
of Weezle Diving Services.*

*We are a family business, set up by
two divers looking for reliability and
value in dive equipment. The
innovative & advanced products in
our range are manufactured to our
design, to the highest specification by
the leading companies in their field.
Our range consists of simple concepts
made into quality products*
