

Data

FAST, RELIABLE, FUTURE PROOF

Our Data Cabling service will ensure that your networks are designed and maintained to the highest standard. Whether using Fibre, ethernet cable or wireless, we have a way to keep your devices connected.

DATA NETWORK INSTALLATIONS

We can design and install a data network that meets any requirements that you have – from small offices or schools to complex multi-site enterprises.

WiFi NETWORK DESIGN AND INSTALLATIONS

We offer a wireless heat mapping service that ensures we design your wireless network to maximise the benefits of the state-of-the-art Access Points we recommend. Our WiFi networks provide the best WiFi coverage for your building and allow for devices to roam without limitation.

FIBRE-OPTIC INSTALLATIONS

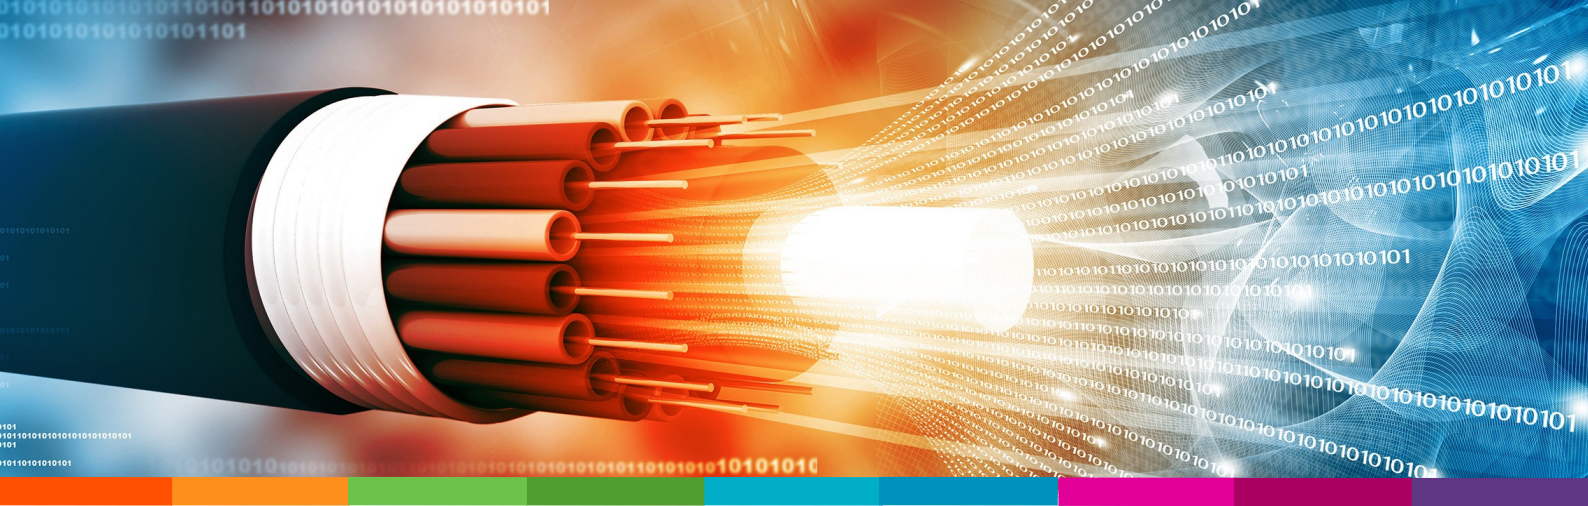

For applications that may require high bandwidth, interference immunity, enhanced security and “future proof” capacity a Fibre install from our experienced data team is the only way to go.

POINT TO POINT/MULTI-POINT RADIO SYSTEMS

Connect sites together in a cost-effective way without the need for civils or cable laying. Secure, fast and very convenient.

Welcome to NETbuilder Data

We offer a fully comprehensive range of data and network solutions, from the design and installation through to supply, testing, certification and support contracts.

No matter what type of cabling you require for your school, college, business, hotel or home, our installation team can advise and install a solution that meets your needs:

Cat6/Cat6a, Cat7, Fibre Optic, Telephone.

We only use well known manufacturers and source equipment from leading suppliers. Our extensive knowledge and field expertise guarantees you the highest standards for your establishment.

All of our engineers are fully qualified with many years of experience with CSCS membership and enhanced CRB checks.

Common Data Services

- Fibre installations
- Data network planning
- WiFi heat map surveys
- WiFi network installations
- Data certification

Servers or desktops, laptops or tablets, Apple or Microsoft - it doesn't matter. We can implement, support and manage your IT systems and infrastructure.

Providing professional Audio and Visual products, state-of-the-art audio systems with HD/UHD displays to give you the ultimate AV experience.

Over 25 years experience of providing a wide range of business class Telephony products and services to the Education and Business markets.

Fibre Optic, Cat5/6/7, Wifi Access and point to point data links for schools, offices and business of whatever size. We can connect you

CCTV and Access Control solutions to meet your budget. Including 2 to 8 Megapixel HD IP / Analogue systems and door access systems.
