About This Catalog & How To Order

Our prices are so low that agreements with our suppliers prohibits us from printing some of them! Contact us for your lowest price today! We accept all major credit cards, wire transfers, Western Union, money orders, personal or company checks.

Progressive Concepts is a factory authorized repair center for most of the products we sell. However, certain items covered under the manufacturer warranty may have to be sent directly back to the manufacturer for repair. Please contact Progressive Concepts before sending any items back for repair. Items that have been authorized for return to Progressive for repair will be given an estimate for the cost of the repairs. Once the customer approves the repair, Progressive will perform the repair in a timely manner and notify the customer that the item is ready. Progressive Concepts shall not be liable for any repair items left unclaimed for over 90 days.

GET PC PRIME...AND SAVE ON ALL YOUR SHIPPING!

DID YOU KNOW...

THE AVERAGE SHIPPING COST FOR AN ORDER IS \$30 OR MORE!

For just \$59 you can get **FREE shipping on all your orders*** for an entire year!

Additionally, you will receive other special offers and discounts not available to the general public.

*Lower 48 Continental United States only. Excluding freight shipments.

Standard Return Policy: If you need to return an item, please contact us within 29 days of purchase for an RMA number. Any items that do not include our 30-day guarantee may be subject to a 25% restocking charge plus shipping. The following items are not eligible to be returned: 1. Plans, transistors and semiconductors 2. PC boards and kits that have been opened and/or soldered-on in any way 3. All computer software products 4. Any custom-made items.

Disclaimer: While you may have the right to experiment with the products in this catalog, misuse of some items may be illegal and/or hazardous. We do not advocate the use of any products for illegal purposes. The purchaser is responsible for determining the legality and/or safety for any application of the products in this catalog. Progressive Concepts shall not be liable for any injuries, losses or damages incurred through the purchase or use of any products in this catalog. By your purchase and/or use of any products in this catalog or our website you agree to the foregoing terms. Any and all offers made by Progressive Concepts are void where prohibited.

Radio Automation For Your Mac!

Radiologik DJ

Radiologik is developed by MacinMind Software for Apple's macOS and is used in radio automation of LPFMs, NCE-FM, college and high school stations and online stations. Radiologik DJ Automation Software is also used by radio and live venue DJs, Sirius/XM channels and is licensed to users in over 60 countries. Fully automated and unmanned stations use Radiologik to pick content by date, intro and outro artists and titles, announce the time, station ID, play podcasts, manage and play advertising by a separate schedule that integrates with the programming schedule and all completely autonomously. **Call for Best Price!**

Automation Software

Windows Automation Software

Aircast is built around a reliable, fully customizable play-out engine, with automation and live assist mode, skinnable user interface, a built-in touch-screen friendly, multi-tab cartwall and Voice Tracking support. It features a Playlist, Cartwall, Cue Editor, Mix editor, events, screen objects and file logging. Voice Tracking, mix-down and scripting are standard. Manage your audio files and playlist logs through Aircast Data Base, the built-in network-enabled audio library, in version STD-DB. It has built-in music scheduling & can also import playlists from various 3rd-party scheduling software.

FM Transmitters

new HIGH EFFICIENCY TRANSMITTER series

Now With Ethernet!

EM250DG

ALWAYS ON AIR

Redundant modules: Three power supply units, four amplifier modules, several power stages, a partial disconnect system in case of short-circuit, and double exciters with automatic switching system all work together to keep your transmission safe and sound and on the air 24 hours a day, 365 days of the year!

HIGH EFFICIENCY

More efficient power modules and power supply units, together with a variable speed fan control system based on the cooling requirements allows for a decrease in electrical consumption of up to 25% on your electric bills, as well as a reduction in HVAC expenses.

ULTRAFAST PROTECTION

Power transistors are protected in less than 1µs in the event of high reflected power (SWR) or overdrive, The Ultra-Fast Protection System provides for a prolongation of service life, keeping you on the air for many years to come!

The flexibility, quality, and compact design together with reduced electrical consumption make these compact transmitters among the best on the market today. They can be supplied with or without the digital stereo generator board. **Call for Best Price!**

FM Transmitters

RVR's **TEX300LCD** is a high quality FM Broadcast Transmitter that offers APC (Automatic Power Control) and Fold-back protection to ensure reliable operation under any operating conditions. The audio performance has super low distortion and low inter-modulation (IMD) values and a high signal to noise ratio for superior audio quality. Basic telemetry is included **FREE OF CHARGE (A \$300 Value)**. This allows you to remotely control your transmitter via Ethernet connection from anywhere on the planet. It also has a built-in high-performance stereo encoder with L&R analog audio inputs, mono inputs and MPX composite signal & auxiliary inputs for SCA / RDS signals. Complete Telemetry option adds email alerts to the other basic telemetry features. Includes Full Two Year Warranty!

TV Sound & Specialty Transmitters

Mono \$199.95

Digital \$299.95

NOW WITH VOLUME CONTROL!

The FCC part 15 Certified mono FM transmitter **FCC ID: MBMACC100** made by Progressive Concepts is perfect for use in Health Clubs or Correctional Institutions as a television sound transmitter where listening to multiple TV sets at the same time with privacy is required. Also perfect for ADA Compliance for ALS Assistive Listening System requirements in public spaces, even churches and houses of worship can benefit from these devices. **Proudly made in the USA!**

- **ACC100** - Silent FM TV transmitter
- **ACC100S** - Stereo version with a built in compressor/limiter FM TV transmitter. Use for perfect audio levels and outstanding stereo separation. Covers an area of over 30,000 Square Feet! Use the this when high quality stereo sound is required
- **ACC100D** - Silent FM TV transmitter with digital audio inputs
- **ACC100DS** - Stereo version with a built in compressor/limiter. Use for perfect audio levels and outstanding stereo separation. Covers an area of over 30,000 Square Feet! Use the this when high quality stereo sound is required

All model ACC100 assembled FM transmitters include a fixed wire antenna, enclosure, RCA cable, T2 power supply and complete operating instructions. Quantity pricing is available. Includes our 30-day money-back guarantee and 2 year warranty. (Toslink Optical Fiber Cable is sold separately).

THESE UNITS ARE FOR FEDERAL GOVERNMENT USE ONLY!

For use in Correctional Facilities. The Panaxis FMX transmitter is available in several versions. The FMX-A is a Programmable, Microprocessor Controlled Phase locked loop, direct FM Transmitter (previously part number; FMX-1). The FMX model FM Transmitters provide extended range to 1000 feet or more. Applications for the FMX transmitter include: Cable modulator or television TV sound re-transmitter. Used in Federal Penitentiaries for transmitting TV sound to Inmates.

- **FMXA** - A type "F" RF output jack for connection to any 75 ohm coaxial cable
- **FMXW** - A built-in soft-wire antenna for easy transmission to a local area
- **FMXEA** - A type "F" RF output jack in an enclosure (power supply sold separately)
- **FMXEW** - A built-in soft-wire antenna in an enclosure (power supply sold separately)
- **FMXEAD** - A type "F" RF output jack in enclosure with digital audio inputs
- **FMXEWD** - A built-in soft-wire antenna in enclosure with digital audio inputs
- **SG2** - Stereo Generator Card with built-in compressor.
- **T2T** - Power Supply
- **TOS3, TOS 6, TOS12** - Toslink Fiber Optic Cables

Antennas

new

Progressive's New **CIRPA** series Broadband Circular Polarized FM Antenna is constructed of High Grade Stainless Steel and Teflon. It handles up to 2KW of RF Power and requires NO-TUNING across the FM band from 88-108MHz! It's lightweight, sturdy construction makes it capable of withstanding the harshest environments. Each element of the antenna is DC grounded to provide excellent protection against lightning discharge. Can be stacked for higher gain!

**EXCLUSIVE

- CIRPA2** - 2Bay 2KW Broadband 0dB (DIN)
- CIRPA4** - 4Bay 2KW Broadband +3.3dB (DIN)
- CIRPA24** - 2Bay 4KW Broadband 0dB (7/8" EIA)
- CIRPA45** - 4Bay 5KW Broadband +3.3dB (7/8" EIA)

Progressive's New **PCP** series FM Broadcast Antenna is composed of two spiral-dipole elements which form a circularly polarized radiator. It's lightweight, sturdy construction makes it capable of withstanding the harshest environments. Each element of the PCP antenna is DC grounded to provide excellent protection against lightning discharge. Each PCP Antenna is factory tuned to your frequency at no additional charge. Can be stacked to achieve higher gain.

- PCP43** - 4 Bay 3KW +3.3dB (DIN)

PERFECT FOR LPFM!

Progressive's New **LB1** broadband vertical dipole FM broadcast antenna has +2dB gain over isotropic. It is constructed from stainless steel for years of trouble free service. For use where 100% vertical polarization is desired. Progressive's LB1 broadband vertical dipole FM broadcast antennas can be stacked for added gain. Each LB antenna is a standard 50 ohms.

- LB1** - 1 Bay 2KW +2dBi (DIN)
- LB2** - 2 Bay 3KW +4dBi (DIN)
- LB4** - 4 Bay 6KW +8dBi (7/8" EIA)

Starting At \$399.99

Progressive's New **GP32** is an omni-directional dipole type FM Broadcast antenna that was designed for indoor broadcast applications. The GP32 antenna can be set to broadcast all over the FM band (87.90 to 108MHz) and still assure a perfect impedance matching with any type of FM transmitter due to the fact that the twin rods can be extended or collapsed in a manner to tailor the length of each of the rods for perfect matching.

ONLY \$59.95

Antennas

The Comet **CFM 95SL** FM Broadcast antenna is a professional quality, commercial grade 5/8 wave antenna that offers 3.4 dBi of gain. It was designed with the needs of the low power broadcaster in mind. This antenna provides exceptional quality and performance with an unbeatable price. Beware of other CFM 95SL "knock-off" brands that claim to be the Comet CFM95SL antenna

advertised at a lower price. There is only one Original Comet antenna, and this is it!

ONLY \$99.95

The **CD95Y** FM Yagi broadcast antenna from Creative Design provides +6dB of forward gain in a highly directional pattern with a 20 MHz bandwidth. That means NO-TUNING is required from 87.50-108MHz. Typical SWR of the CD95Y Antenna is <1.5:1 across the band. It handles up to 500 watts. Can be mounted horizontally or vertically. It is constructed of high grade aluminum and comes with N-Type RF connector.

Just \$349.99

Only \$229.99 **new**

The Alan Dick (Jampro) model **JFWD** is a broadband folded dipole FM broadcast antenna that requires no tuning from 88-108 MHz and has an "N" type input connector. The antenna handles RF power up to 300 Watts and is sealed for long term durability in all weather conditions. The antenna is DC grounded for excellent protection against near hit lighting and static discharges.

**BROADBAND
REQUIRES NO TUNING**

Item	Description
JFWD	Broadband Folded Dipole Antenna +2.8dB, 300 Watt (N) - \$229.99
JFWD2	2-Bay Broadband Folded Dipole +5.1dB, 600 Watt (N) - \$899.95

The Norwalk Dominator Antenna **NWE34** for FM Broadcasting. Wavelength: 3/4 wavelength. Approximate height is 9 feet (depends on frequency). Frequency Range: 87.50 - 108 MHz (Tunable). Gain over half wave dipole is about +3dB (+5.15dBi). Power handling capacity is 1KW on standard model with your choice of Teflon "N" connector or SO-239. The NWE34D handles 3KW with 7/16" DIN Connector. Bandwidth is 5 MHz with a perfect 1:1 SWR at the center. Have us professionally tune this antenna for you for a small fee!

EAS Encoder/Decoders

Formerly Monroe Electronics, Inc.

Starting As Low As **\$1969** with New **Version 4.0** Software!

The new Version 4.0 software represents another major step for EAS/CAP security and compliance management. This upgrade is way beyond a few code tweaks or simple changes, it implements a substantial series of security minded features along with several new functions and improvements, all in response to a wide range of customer requests and in-line with the latest FCC compliance requirements. Made in the USA!

Adding new powerful and completely unique features like Triggered CAP Polling™, Version 4.0 users are able to leverage the benefits of CAP message over simple EAS text thereby presenting critical information in far more detail to the public and station management.

Over a 100 other improvements and additions ...

- Added the new “BLU” alert event code to support states and emergency managers seeking to include this special code in their requirements.
- Support for ALL international time zones – including those interesting half-hour offsets
- Incorporated latest version of EMnet™ package for Comlabs users
- Added new IPAWS Certificate Authority (CA) bundle
- Adopted new naming convention to easily identify earliest date of expiry for Certificate Authority (CA) bundles
- Increased debug logging information to quickly track and resolve issues
- Improved constant MPEG streaming player to significantly reduce CPU resources
- Expanded email string to allow more than 700 characters in the recipient list
- Improved GPO relay handling across group settings

... and many more!

The **MT/MR PLATINUM FM** (Studio-to-Transmitter Link) is comprised of an STL transmitter and an STL receiver. The 20W (200-960MHz) transmitter is externally synthesized in 20MHz sub-bands and is adjustable in 25KHz steps using a built-in microprocessor (10KHz optional). Through the front panel LCD display, users can check the following parameters: frequency (6 digits), forward and reflected power, modulation level and pilot signal (19KHz) in transmission. It has balanced mono, stereo (MPX) and 3 SCA inputs, together with SWR fold back protection. The double conversion receiver is externally synthesized and it has the same informational features as the transmitter; it has balanced mono, stereo (MPX) and three SCA outputs. **Call for Best Price!**

These STL yagi antennas for TX&RX applications can be used in both vertical and horizontal polarization offering great directivity. The STLY are high quality, low cost antennas. They are made of aluminum with stainless steel clamps, and have an N(F) input connector for use on frequencies from 175-960MHz (in 20/30MHz sub-bands) and 10-14dBd gain, depending on the operating frequency. These antennas feature high gain, light weight construction and withstand the harshest weather environments. **Call for Best Price!**

- 10dB STL Yagi Antenna for 176-600 MHz (up to 5 Miles) **Item: STLY**
- 10dB STL Yagi Antenna for 1.4-1.5GHz Links (to 5 Miles) **Item: STLY1**
- 15dB STL Yagi Antenna 176-600 MHz (up to 15 Miles) **Item: STLY2**
- 14dB STL Yagi Antenna for 940-960MHz Links (to 15 Miles) **Item: STLY9**

On-Air Mixing Consoles

Flexible Mixers That Adapt To Your Needs!

The D&R AIRLITE is an intelligent mixer with 3 very low noise Mic inputs and an internal USB control section that speeds up daily use & includes a built-in Silence Detector. It also includes built-in Telephone VoIP functionality. Features four channels of stereo USB which accept and instantly control up to 4 in/out stereo channels from your Play-out software.

Audio Solutions

Inovonics 631 is of frequency receivers for other critical

the 2nd generation agile, digitally tuned FM translator and off-air reception

applications. It features menu-driven access of display and function selections, provides a switchable IF bandwidth to help solve difficult adjacent-signal problems and readouts of signal strength and multipath distortion to aid antenna alignment. Selectable options and alarms may be remotely controlled or monitored and high-resolution bar graph readouts give accurate indications of incoming RF and MPX/stereo audio levels.

Item

Description

631

Programmable FM Receiver

- AARON 640 provides many of the features of its big brother AARON 650, but at a budget-friendly price point.
- Digitally decodes the entire Analog baseband. Outputs are low-latency MPX, Balanced Analog and AES-Digital signals for retransmission.
- The back panel provides a 50 Ohm (N) antenna connector, a true (off air) composite output.
- Advanced control and editing of all tuning and monitoring parameters.

- AARON 650 combines premium features with unparalleled receiver performance.
- Composite pass-through eliminates retransmission delay (latency) and composite-regeneration lends the ability to completely reconstruct your baseband signal for reduced noise, even altering RDS messaging prior to rebroadcast.
- The back panel provides dual antenna inputs and dual composite outputs.
- Advanced control and editing of all operating parameters. Failover audio backup is provided via a front-panel SD Card or web-stream should your signal go down.

Inovonics' AARON series is a new premium FM rebroadcast/translator receiver developed to meet challenging reception scenarios. The extremely sensitive and selective front end digitally decodes the entire Analog baseband. Balanced Analog and AES-Digital audio and remote IP access. Rear-panel and self-logging alarms constantly check for Audio Loss, RF Loss, and RDS Loss (or 'hijacking'). Online notifications can alert personnel with e-mail or instant text messages when any of the alarms occur. The front panel displays left and right audio metering, local LED alarms and an LCD screen with jog wheel for control. AARON "responsive" web interface allows complete setup, listening, logging and control of the unit from your PC, tablet or smart phone and reliable 2-way connectivity is ensured with a built-in Dynamic DNS utility. Advanced off-air metering tools include an FM Band Scanner and FFT of the MPX region. Reception bandwidth, auto-blending and many other receiver parameters are controlled via manual or automatic reception processing.

FM Rebroadcast Receiver

Audio Solutions

Item	Description
808	HD Radio Processor

Introducing the all new INOmini 402, a small form factor RDS Message sign driver and receiver. It tunes the FM full band, taking a station's now playing RDS text and sends it to a wide variety of large format scrolling "marquee" style signs for display. This conveniently provides for large, continuous and clear RDS verification of now playing info at station studios, control rooms and external billboards.
*sign pictured sold separately.

Inovonics 514 FM Multiplex Decoder demodulates MPX to Balanced L/R Audio, Digital AES output, Alarms for Loss of Audio and Pilot Loss.

The INOmini 639 is an FM and FM/HD Radio™ receiver for professional off-air broadcast monitoring. It receives standard analog-FM broadcast transmissions as well as FM/HD Radio™ digital broadcasts transmitted 'in-band, on channel' via the FM station's associated HD1 through HD8 auxiliary digital broadcasting channels.

Audio Solutions

NEW

Inovonics' SOFIA **Item: 568** provides analog, AES3-digital and AoIP-streaming audio outputs. It collects histograms of signal parameters and displays HD Radio™ album artwork, station logos and similar visuals via the Web interface. SiteStreamers™ also deliver important RF and audio signal measurements and dispatch email or text-message alarms for out-of-limits conditions and other reception errors. **Call for Best Price!**

Inovonics **Item: 236** is tailored for **AM broadcasting**. It combines the functions of slow, 'gain-riding' AGC, 'syllabic' consistency leveling, 4 stages of parametric EQ,

3 bands of dynamic range compression with variable crossovers, 'brick wall' bandwidth restriction and a final no-splatter peak controller that supports asymmetrical carrier modulation. In addition IP interface allows 2-way program streaming, plus total remote control using any PC or mobile device. **Call for Best Price!**

Inovonics' **Item: 531N** is the ultimate choice for essential FM signal monitoring. Dependable, direct input and off-air reception lets you keep a sharp eye on your total RF signal performance whether you're right at the transmitter site or half way around the world.

The COM LIM 20 audio processor is the combination of a professional Digital Stereo Generator (with more than 60dB per channel separation) and a high dynamic range adjustable limiter, with a stop band rejection of greater than 90dB above 75KHz. With a host of advanced features such as a 4-band equalizer and optional digital audio inputs, the COM LIM 20 is a very useful tool in any radio broadcast studio. It also includes a built-in RDS/RBDS digital encoder! Programming and control is done via front panel LCD display. **See our Website for New Lower Price!**

Barix Exstreamer 500 technology has given new meaning to the IP audio streaming market. It delivers crisp high quality audio over standard network infrastructure by using standards such as MP3, G.711 and even uncompressed. It features encodes/decodes audio in high quality, AES/EBU and balanced stereo audio interfaces (inputs and outputs), Supports streaming (http, UDP, RTP) with automatic failover and USB playback 10/100 Mbit Ethernet connection, Contact closure interfaces (4 in, 4 relays), Control via standard web browser as well as serial, TCP, UDP,cgi API, Used in most Broadcast applications. Barix Exstreamer Technology is the solution to your tough STL link requirements where line-of-site microwave is impossible due to buildings, mountains, or large distances. Balanced XLR IN/OUT Audio Cables Are Included! **Item: EX500**

Audio Codecs

BARIX

The Barix Instreamer and Exstreamer 100 are versatile network audio over IP transmitter and receiver units which can be used in a variety of applications. They enable users to create flexible, cost-effective distributed audio systems using standard IP technology.

- The Barix Exstreamer 100 plays MP3 as well as G.711 & PCM audio files from PC or web server (http) as well as legacy digital and analog sources (using the Barix Instreamer) and can stream from other sources as well.
- Both the Barix Instreamer and Exstreamer can be easily controlled by a standard web browser and/or with the optional Barix IR remote control.
- Used in pairs, both the Instreamer 100 and Exstreamer 100 are needed for a complete solution. Please select both products when placing your order.

Item: IN100, EX100 Call us to get your Best Price on all of these Barix Products!

The Exstreamer 100 | 105 IP Audio Decoder decodes and plays multi-protocol and multi-format audio streams, including MP3, AACplusV2, WMA, PCM, G.711, and Ethersound. It features a stereo line level output, headphone connection, and low power consumption. The Exstreamer 100 | 105 is a reliable IP-enabled audio streaming device which can be used in a variety of audio over IP applications such as local and internet-based IP music distribution systems, in-store audio applications, paging and announcement systems. **Item: EX105**

DEVA DB90-TX is an integrated audio converter that converts audio signal into a high quality compressed audio stream. The signal can be compressed by HE-AAC, MPEG-1 Layer 3 encoder. DB90-TX also supports uncompressed PCM stream in order to ensure audio transmission without quality loss. Compression is performed in real time, and the output signal is transmitted directly by IP-based networks. DB90-TX can work with both analog and digital audio signal. **Call for Best Price!**

DEVA DB90-RX is an integrated client for IP transmitted digital audio signal. It is a device designed to support HE-AAC and MPEG-1 Layer 3 compressed audio streams and PCM uncompressed stream for audio transmission without quality loss. Decoding takes place in real time by a powerful DSP processor and the output signal is both in digital and analog form.

RF Power Meters

Need Some Extra Cash?

Progressive will **PAY YOU** for your *gently* used BW Broadcast transmitters!

- Please note that the transmitter **MUST** specifically be a BW Broadcast brand FM Transmitter
- We will only be accepting 2006 or later models
- You must be the legal owner of the transmitter
- The transmitter must be FCC Type Certified
- We require a physical evaluation of the unit prior to estimating the value of payout
- Customer is responsible for the shipping costs to Progressive

The Diamond Antenna RF Power meter SX series scale is calibrated for forward and reverse power, and SWR. Switch selectable average RMS and PEP. They have three power ranges that are switch selectable under "Full Scale Power".

As Low As \$109.95

- **SX100:** 1.6-60 MHz, 30/300/3000 Watts
- **SX200:** 1.6-200 MHz, 5/20/200 Watts
- **SX400:** 140-525 MHz, 5/20/200 Watts
- **SX600:** 1.6-160 & 140-525 MHz, 5/20/200 Watts
- **SX1100:** 1.8-160 & 430-1300 MHz, 5/20/200 Watts

The Coaxial Dynamics Model 81000-A RF POWER Wattmeter can measure RF Power in 50-Ohm coaxial cable and transmission lines, and accept plug-in elements in the range of 100 mW to 10 kW full scale, and from 0.45 to 2300 MHz. They come complete with a built-in line section and Quick Match RF connectors for 50-Ohm cables and transmission lines. Simply connect the Wattmeter between the transmitter and antenna or dummy load, plug in the appropriate measuring element and select forward or reflected direction. The RF power is directly displayed on the large 4-1/2 inch triple-scale meter.

Analyzers & Filters

The CAA-500 Measures and displays antenna properties without the need for a separate transmitter and SWR bridge. Its highly accurate analog meter displays SWR and impedance in real time, continuously, as you sweep the selected frequency range. Seven frequency ranges from 1.8MHz to 500MHz. Thumb wheel frequency adjustment effortlessly sweeps the frequency range. Two antenna connectors: SO-239 for 1.8-255MHz and N-female for 300-500MHz. Impedance: 12.5-300 Ohms. VSWR: 1:1 to infinity. Digital readout accurate to 1kHz. Only **\$439.99**

The Telewave TWPC-1005-1 & TWPC-1005-2 are 5" diameter, 1/4-wavelength, high "Q" bandpass cavity filters with superior selectivity. Bandpass cavities reject all frequencies outside a narrow pass-band, reduce transmitter sideband noise, and also protect receivers against desensitization. All cavities are tuned to specified frequencies prior to shipping, and no further adjustments are required. These cavities feature calibrated adjustable coupling, and insertion loss can be easily set from 0.5 dB to 2 dB or more to improve selectivity. At densely populated sites, the TWPC-1005-2 dual cavity filter provides greater selectivity with minimum insertion loss. Multiple cavities can also provide a wider passband when required. Telewave Ground Loop technology places the center conductor of each coupling loop at DC ground for lightning protection and noise reduction. Telewave cavities handle up to 350 watts, depending on insertion loss. In/Out are Type-N connectors. **Item: TWPC, TWPC2** **Call for Best Price!**

If your harmonics fall on or near a TV channel or Maritime frequency you could cause severe interference to that channel. The most common cause of fines from federal agencies is due to TVI or other interference from your transmitter which generates a complaint. Use of a Low Pass Filter is the best method of eliminating this kind of interference. Includes our 30-day money back guarantee and a full 2 year warranty! **Made In The USA!**
