

MULTI-FILTER MANIFOLD SYSTEM

Remove sediment from high volumes of water with this multi-filter system.

- Allows a high volume of filtered water to transit from site
- Compatible with our full filter range
- Can be used, removed and attached by one person
- Mitigates vacuum tankering fees and reduces site downtime
- Available for use with 4, 6 or 8 filters
- Can process high volumes of water
- Rugged design for site use
- Reduces pressure on filter system

FOR HIGH VOLUME WATER FILTRATION

HOW IT WORKS

The manifold systems are designed to allow high volumes of water to be processed through Green Rhino® filters. Multiple filters can be set up allowing for a steady continuous flow of water even when using high bore pumps. It can function as a "step-down" unit to reduce and disperse water volumes whilst allowing maximum filtration.

SPECIFICATION:

CODE	PRODUCT	PRODUCT SIZE
GRR 99 01 04 MSYS	Multi Filter Manifold System - 4 Gang c/w 4" Bauer Fitting	97.5cm x 111.2cm
GRR 99 01 06 MSYS	Multi Filter Manifold System - 6 Gang c/w 4" Bauer Fitting	147.7cm x 111.2cm
GRR 99 01 08 MSYS	Multi Filter Manifold System - 8 Gang c/w 6" Bauer Fitting	197.9cm x 111.2cm
