

# Trunking

## Heavy Gauge

**PSJ**  
FABRICATIONS  
A WOOD GROUP MUSTANG COMPANY

## The Complete Cable Management Solution

PSJ Fabrications' trunking has been designed with quick and easy installation in mind, leading to cost and time savings. It brings together over 50 years of experience in the manufacture and supply of high quality metal products. Used throughout industry in most industrial applications, heavy gauge trunking is designed to protect and manage cables that otherwise would be run over the factory floor. Our heavy gauge trunking has been supplied to many key clients within the automotive and food and beverage industry sectors.

### Key services offered

- Design and Development
- Sheet Metal Fabrication
- Non-ferrous and Ferrous Coded Welding
- Prototyping and Batch Work
- Project Management
- Finishing

**PSJ**  
FABRICATIONS  
A WOOD GROUP MUSTANG COMPANY

PSJ Fabrications Ltd are a leading specialist in sheet metal design, fabrication and finishing, producing precision engineered components and equipment for a diverse range of industries.

Established in the 1960s and using state-of-the-art equipment and the latest finishing technology, our skilled workforce is able to supply high quality products in a wide range of materials, thicknesses and specifications.

PSJ Fabrications offers a bespoke service, designing parts adapted specifically to client needs and providing high quality customised solutions.

## Product Information

PSJ Fabrications' heavy gauge trunking is constructed from 2mm thick galvanised steel, providing resistance to rust. It has been developed using the company's vast expertise and knowledge of sheet metal installations across some of the largest factories within the UK.

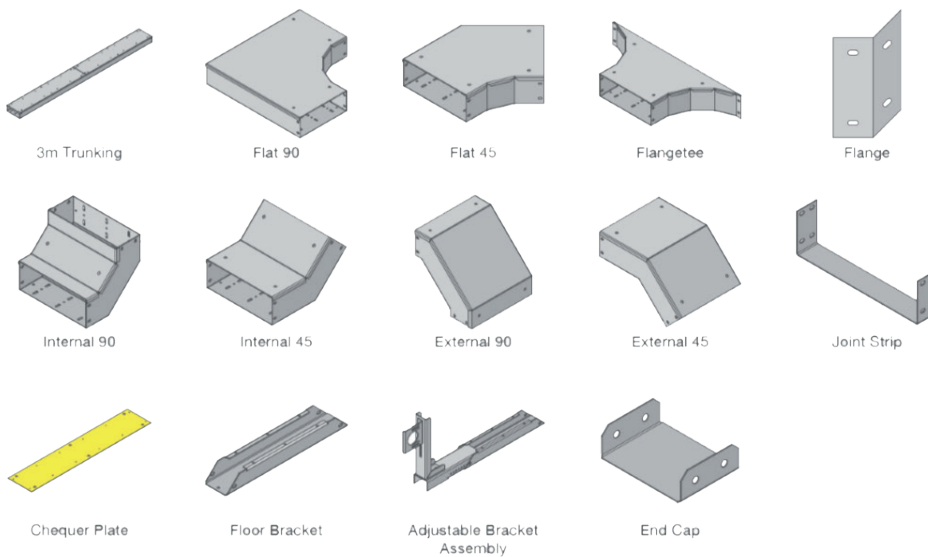

Installation time has been reduced due to the trunking not requiring "dinrail" or any other third-party product to fix to the floor. PSJ Fabrications uses its own floor bracket, that is quick and easy to fit. The trunking also has pre-punched fixing holes for segregation plates, making them simple to fit on site.

PSJ Fabrications also supply a range of jigs to allow the installer to drill joining holes quickly and precisely. In addition the lids are securely fastened with 180° quick release turnbuckles.

A pipe bracket assembly can be incorporated into the system, it attaches to the floor bracket and allows pipes to run in parallel with the trunking. Chequer-plate lids are also available. Chequer-plate lids provide extra grip and visibility and can be painted to a colour of your preference or left unpainted.

The standard heavy gauge is 110mm high and is available in a range of widths from 100mm to 600mm. However, PSJ Fabrications can also custom make it to any size that you require and when one size is not enough, different size and gauge trunking throughout the range can be assembled and incorporated into the same solution.
