

Larmer Brown Lite LMS

The Larmer Brown Lite LMS is a 'lightweight' learning content management system providing the key benefits of an LMS, without the heavy resource overhead.

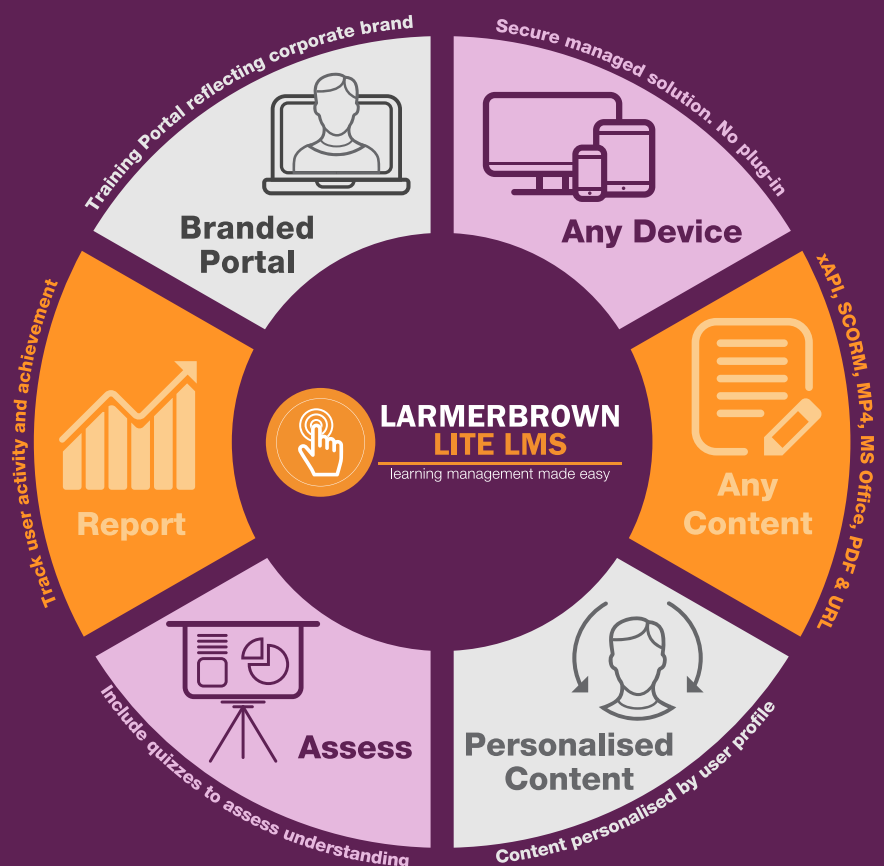

Offering streamlined learning management functionality, this Lite LMS makes it quick and easy to deliver relevant learning content specific to each learner's requirements, either as mandatory or optional courses. Course administrators can set up and deploy new courses to your learners in minutes.

This responsive learning solution can be accessed on any device. Its clean and simple design was developed following extensive research to understand how learners wish to access their learning content, making it as simple as one 'click' to access a course.

LB Lite LMS supports a blended course design allowing your learners to access eLearning, video and documentation as well as links to external content within a single course. It is compatible with eLearning authored in xAPI, the leading standard for learning content, as well as SCORM.

Utilising xAPI enables you to track and report on learning usage at a granular level, allowing you to easily measure capability across your entire organisation.

Reports are available as standard within the Lite LMS, showing complete, incomplete, passed and failed results. Further reports can be configured if required.

Larmer Brown Lite LMS

When accessing LB Lite LMS learners will see their required learning as well as a personalised learning plan made up of suggested learning and any other courses they have added themselves. Learners can also search for specific content by keyword.

This Lite LMS is a customisable solution that can be designed around your organisation's specific requirements, including your corporate brand. It is flexible and can be adapted and changed as your requirements and the needs of your learners evolve.

An integrated eLearning course is available to get both administrators and learners up and running fast.

About Larmer Brown

Larmer Brown has provided change management and learning solutions to corporate clients since 1984. Our primary objective is to help organisations with the implementation of learning initiatives through content development and training delivery programmes.
