

Invesco AT1 Capital Bond UCITS ETF

This document is for use in the UK, Ireland and Switzerland only, and for Professional/Institutional/Accredited Investors and Qualified Clients as specified in the Important Information section. It is not for consumer use in other countries. Please do not redistribute.

This factsheet contains a summary of the Invesco AT1 Capital Bond UCITS ETF, an exchange traded fund (ETF), and is for discussion purposes only. Please consult the Key Investor Information Document and prospectus and note the additional important information overleaf.¹

Investment objective

The Invesco AT1 Capital Bond UCITS ETF aims to provide the performance of the Markit iBoxx USD Contingent Convertible Liquid Developed Market AT1 (8/5% Issuer Cap) Index, after the impact of fees.

Key advantages

- Transparent fees and costs

Key risks

- No capital protection: you may not get back the amount you invested
- No guarantee that the ETF will track the index exactly
- Changes in the exchange rate between base currency and trading currency may affect returns
- Fund invests in contingent convertible bonds, a corporate debt security that may be converted into equity or forced to suffer losses upon the occurrence of a pre-determined event. Other notable risks include liquidity and default
- May have significant exposure to lower credit quality bonds which increases risk of volatility

About the index

The index is a customized version of the iBoxx USD Contingent Convertible Liquid Developed Market AT1 index in which the weight of the top 5 issuers is capped at 8% and the remaining issuers are capped at 5%. It is designed to reflect the performance of financial institutions' AT1 contingent convertible debt. It aims to offer a broad coverage of the USD AT1 capital bond universe, whilst upholding minimum standards of investability and liquidity.

Sector Exposure

Portfolio weightings and allocations may change.

Credit Rating

Performance

ETF performance is in the fund's base currency and includes reinvested dividends. ETF performance is based on Net Asset Value after management fees and other ETF costs but does not consider any commissions or custody fees payable when buying, holding or selling the ETF. Historical index performance prior to the index launch date of 31 Dec 2013 is simulated and has been calculated by the index provider using the index rules. The ETF does not charge entry or exit fees. Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in this factsheet. **Past performance (actual or simulated) is not a reliable indicator of future performance.**

What are ETFs?

ETFs are open-ended UCITS funds. Unlike traditional open-ended funds, ETFs can be bought and sold on a stock exchange like ordinary shares.

How does this ETF achieve its investment objective?

The ETF uses physical replication to aim to achieve the target index performance. The ETF invests its assets directly in the constituents of the benchmark index.
