

Exterior Finishes

Exterior 450 Stain

GF's Exterior 450 Stains are premium quality, exterior pigmented stains designed for outdoor projects. They contain U.V. absorbers and mildewcides for maximum protection from the elements. Exterior 450 Stains can be applied by brush, roll or spray. You have two options: Apply two coats Exterior 450 Stain with no topcoat for a semi-transparent look, or apply one coat of stain, wipe off and apply several coats of Exterior 450 Clear Finish. Available in: Natural Base and 8 colours.

Exterior 450

Designed for exterior wood applications, Exterior 450 varnish provides your wood with a tough, protective finish that will withstand the rigors of the sun, rain, and wind. Ideal for outdoor furniture, doors, and case goods, Exterior 450 is fortified with UV absorbers to help minimize fading and maximize

performance. Its built-in mildewcide retards mould and mildew growth.

Sheens: Flat, Satin, Semi-Gloss and Gloss.

Outdoor Oil (Oil Based)

Outdoor Oil is an exterior-rated penetrating linseed oil. It contains UV stabilizers, mildew inhibitors, and twice the oil contained in competing brands.

We highly recommend Outdoor Oil for all outdoor wood projects, particularly wood furniture. It can be used by itself, over any stain, and on pressure treated wood.

Milk Paint

Milk Paints are suitable for indoor or outdoor use. See details in Dyes, Stains & Paint section.

Oil Based

Gel Stain

This is the stain that has the most "finishing feel" of all our products. Gel Stains are formulated with a combination of pigments, oils, and urethanes to produce a durable and beautiful "hand-rubbed" finish. These easy-to-use stains simply wipe on with a cloth or applied with a foam brush. Available in: 11 colours.

Spray Guns

Graco Finex HVLP

All our water based products are ideal for spray application. We stock the Graco Finex range as it is well-balanced, lightweight and offers a more affordable way to spray:

- Air Caps optimized for high quality spray performance
- Lightweight, ergonomic gun
- Light trigger pull
- Integrated air inlet adjustment valve.

Other Products

See our web for details of other products including: Glaze Effects, sanding pads, foam brushes & paint pads.

Stockists

General Finishes Europe, 15 Huss's Lane, Main Street, Long Eaton, Notts. NG10 1GS.

Water Based Finishes

General Finishes make the finest wood finishes. They are easy to use, the colours are fabulous and the top coats are strong and long wearing. Whether you want the bold, luscious colours of water based paints and stains or the classic traditional wood tones of our wipe-on hybrid finishes, we have the finish for you.

NEW

Enduro-Var

A highly advanced water based self crosslinking coating that feels and looks like an oil base product.

NEW

Wood Turners Finish

Non-toxic water/oil urethane hybrid finish for woodturnings and salad bowls. Dries to a warm rich amber tone.

High Performance

Our best selling consumer polyurethane topcoat is hard and highly durable.

Exterior 450

A tough, protective finish that will withstand the rigors of the sun, rain, and wind.

Dyes, Stains & Paint

Milk Paint

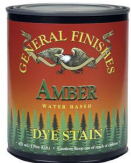

Milk Paints are the star of the furniture fashion market. They are interior/exterior acrylic paints suitable for indoor or outdoor furniture, crafts, and cabinets and can be applied directly from the can to produce a high quality satin sheen finish. When used with Glaze Effects, you can create all the new decorative finishes such as distressing, antiquing, marble effects, rag rolling, or colour washing.

Available in: 20 Colours.

Dye Stain

General Finishes Dye Stains are unique, ultra penetrating stains designed to work like solvent-based stains. The deep rich tones enhance the wood grain and produce vibrant colors especially on woods like cherry, walnut and maple. They can also be used as a toner when mixed with GF water based topcoats. GF Dye Stains are water based ready to use, fast drying, and have excellent lightfastness.

Available in: 13 Colours.

Wood Stain

Our Water Based Stains have all the advantages of oil base stains: they spread easily, can be repaired, can be blended effortlessly, and have plenty of open time. The thicker formula allows controlled penetration, which will reduce blotching on hard-to-stain woods such as Aspen, Pine and Maple. This stain formula will make wood staining an enjoyable experience for you. Use Natural W.B. Wood Stain (clear finish) if you need to pre-seal the wood. Available in: Natural and 15 colours.

Top Coats

Polyacrylic Blend

This crystal clear finish is our standard top coat for furniture and woodwork. Formulated to be durable and consumer friendly, it flows and levels easily and has great adhesion characteristics. It has strong sag resistance for vertical surfaces and its higher polyurethane content provides greater durability than other polyurethane/acrylic blends. Sheens: Flat, Satin, Semi-Gloss, and Gloss.

High Performance Top Coat

Winner of Fine Woodworking's Best Overall Choice Award, High Performance Top Coat is a very hard and durable consumer polyurethane top coat, suitable even for floors. It contains all the consumer friendly characteristics of PolyAcrylic Blend. In addition it contains a UV Stabilizer to protect it from breaking down in sunlight and to protect the underlying stains from fading.

Sheens: Flat, Satin, Semi-Gloss and Gloss.

VAR Top Coat

Enduro-Var is a self crosslinking polyurethane that looks more like an oil varnish than a water coating. It ambers slightly, is an extremely durable coating, is both sprayable and brushable and is highly water resistant. Suitable for floors, cabinets and millwork. Sheens: Flat, Satin, Semi-Gloss and Gloss.

Wood Turner's Finish (hybrid)

WTF is a non-toxic water/oil urethane hybrid for use on wood turnings, salad bowls, and other turned projects. It produces a rich amber tone and dries to recoat in minutes. It is easily applied by many methods: wiping on with a clean cotton rag; brushing with a poly foam brush or synthetic brush; sprayed with HVLP gun; or air brushed. The final coat can be buffed to a high gloss using super fine sanding pads.

Enduro Pro, Spray Applied

Sanding Sealer

Enduro Water Based Sanding Sealer is a clear undercoat that forms an easily sandable foundation for any GF Enduro water based top coats (including Pre-Cat). The high solids content builds a fast film. The stearates make the sanding process smooth and easy, drying tack free in 10-20 minutes.

Pre-Cat Urethane

Enduro Pre-Cat Urethane utilizes the latest resin and cross linking technology to provide maximum toughness, durability and water resistance. It is comparable to any conversion varnish or pre-catalyzed product.

Sheens: Flat, Satin, Semi-Gloss and Gloss. Enduro Crosslinker can be added to improve performance.

Cross Linker

Crosslinker is a catalyst that causes molecules in topcoats to crosslink forming a harder film with increased water and chemical resistance. Crosslinker can be used in any of the waterbase topcoats. Polyacrylic, High Performance, Sanding Sealer and the Enduro Pre-Cat Top Coat. Once the Crosslinker is added you have 24 hours before it depleishes. You can re-add more Crosslinker to the finish to reboot the finish again.

Enduro Lacquer

Enduro Water Base Lacquer is a new generation water base technology providing enhanced water and chemical resistance at an economical price. Water Base Lacquer dries fast for rapid recoating. It illustrates superior performance to solvent based lacquers, providing improved stack-times, hardness, lacquer thinner resistance, and fingernail polish remover resistance.

Sheens: Flat, Satin, Semi-Gloss and Gloss.
