

CLIMAVER neto

CLIMAVER Self-Supporting Ducts

Description

High-density, ISOVER rigid glass wool panel; the external facing is covered with kraft paper and glass mesh reinforced aluminium foil, which acts as a vapour barrier, and the internal facing with a black reinforced glass neto fabric with high mechanical resistance.

Applications

Because of its excellent acoustic properties and thermal behaviour, **CLIMAVER neto** is a suitable solution when installing:

- Networks of self-supporting air-distribution ducts in thermal installations within air-conditioning systems in buildings.

Advantages

- Easy cuts. No risk of breaking during handling.
- Highest airtightness class.
- Optimal acoustic ambient quality and comfort class.
- Resistant to aggressive cleaning methods; UNE 100012.
- Duct union continuity. Exclusive male/female leaning shiplaps of the panels.
- Unique guiding mark lines for SDM (Straight-Duct Method) cuts.
- No proliferation of mould and bacteria. Trials according to EN 13403
- Sustainable product. 100% recyclable. Recycled material > 50%
