ROLLER GRILL DEEP FRYER

The cold zone enables you to fry successively in the same oil for French fries, fish, donuts, etc. The temperature of the oil at the bottom of the tank and above the resistance has a differential of 100°C. This cold zone at the bottom of the fryer consists of an automatic filtering of the oil by settling and decanting. This electric fryer range is equipped with a precise bulb-thermostat for the regulation of temperature (0-180°C) and with a double safety thermostat with positive cutoff. Both thermostats are in stainless steel. In the event of overheating or insufficient oil, the safety thermostat automatically stops the stainless steel fryer. After identifying the cause of the automatic shutdown, the safety thermostat must be reset by simply pressing a push button behind the stainless steel housing.
