

# Sailing Range

## Legendary performance and strength

Nanni has the expertise to supply you with the right engine and the right transmission for your boat and program.

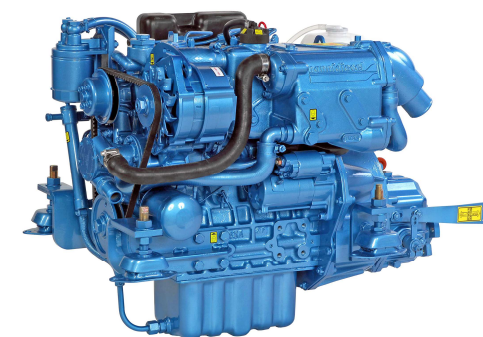

Nanni engines are using advanced injection technology, well ahead of the future emission standard's compliance. All engines up to the N4.60 are compliant with EPA Tier 3.

Nanni engines are reliable, for a safe usage in harsh conditions with less maintenance.

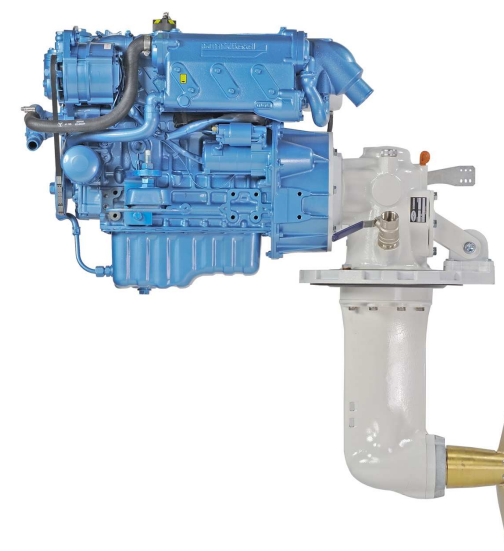

At the same theoretical power, Nanni engines have more torque and are more effective in terms of propulsion.

It is the choice of around-the-world racers and cruisers, such as Michel Desjoyeaux, winner of the last Vendée Globe.

The engine gears are strong and well-manufactured for an excellent yield, sturdiness and longevity.

More performance for a greater sailing experience, in either shaftline or sail-drive version....

A smart solution for your budget and fair for the environment, be it to :

- SAIL AROUND THE WORLD on one, two or three hulls,
- REACH THE RACE COURSE fast and to be the first back at the marina,
- ENJOY COASTAL CRUISING with autonomy and safety.

## Nanni Sail Drive Range - for sailing yachts

Discover the Nanni Kubota based range specifically designed for sailing yachts, eight models from 10hp to 60hp

The Nanni sail drive range consists of eight new SP60 Sail Drive packages with engines from 10hp to 60hp meeting the demand of many customers and prestigious shipyards. Nanni engines are setting the ultimate standard in efficient maneuvering at low speed, robustness and power at low rpm, comfort and safety in harsh weather conditions and longevity.

Engine model	Power hp (kW)	Nb cylinders	RPM	Displ. cm3	Weight kg	Aspiration
N2.10	10 (7.36 )	2	3000	479	123	Natural
N2.14	14 (10.3 )	2	3600	479	127	Natural
N3.21	21 (15.4 )	3	3600	719	141	Natural
N3.30	29 (21.3 )	3	3600	1123	180	Natural
N4.38	38 (27.6 )	4	3000	1498	185	Natural
N4.40	40 (29.4 )	4	2800	1999	250	Natural
N4.50	50 (36.8 )	4	2800	2197	258	Natural
N4.60	60 (44.2 )	4	2800	1999	270	Turbo

### Wide choice of propellers

A wide choice of 2 bladed, 3 bladed and folding propellers is available in diameters ranging from 14 to 18”.

### New SP60 Saildrive

Ahead in performance and easy to operate :

- Less drag & less resistance
- Reduced noise and vibrations from the transmission
- Reinforced waterproofing
- A simplified installation
- Electrical insulation from the engine in order to reduce galvanic corrosion
- Can be installed with engine facing forward or rear
- Smooth shifting forward/reverse

## Nanni Shaftline Range - for sailing yachts

Nanni's commitment for reducing environmental impact starts by a proper dimensioning of the engines enabling a yacht to reach its optimal cruising speed, without overpowering it. Moreover, Nanni's technical know-how and experience in the field have always ensured high quality end products. Our shaftline range for sailing yachts from 10hp to 115hp gives you robustness and power at low rpm.

Engine model	Power hp (kW)	Nb cylinders	RPM	Displ. cm3	Weight kg	Aspiration
N2.10	10 (7.36)	2	3000	479	123	Natural
N2.14	14 (10.3)	2	3600	479	127	Natural
N3.21	21 (15.4)	3	3600	719	141	Natural
N3.30	29 (21.3)	3	3600	1123	180	Natural
N4.38	37,5 (27.6)	4	3000	1498	185	Natural
N4.40	40 (29.4)	4	2800	1999	250	Natural
N4.50	50 (36.8)	4	2800	2197	258	Natural
N4.60	60 (44.2)	4	2800	1999	270	Turbo
N4.85	85 (62.5)	4	2800	3053	350	Turbo
N4.100	100 (73.6)	4	2800	3053	360	Turbo/Intercooler
N4.115	115 (84.6)	4	2600	3769	378	Turbo/Intercooler

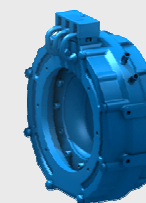

Robustness &  
power at low  
RPM

## More options for your sailing yacht

Nanni also offers a range of generator sets and accessories especially adapted for sailing yachts, powering your cruise under any weather condition with a customized propulsion or energy solution.

For a clean, quiet cruising, the Nanni Hybrid System can also be adapted to all Nanni engines starting at 30hp.

For more information about other Nanni Products, please contact your local dealer or go to [www.nannidiesel.com](http://www.nannidiesel.com)
